Addenda:

Statistical data used in the text and tables of this volume are on a fiscal year basis, unless otherwise noted. For example, data headed "1978" pertains to the fiscal year ended Sept. 30, 1978.

In certain graphs and charts, to illustrate the text, figures have been rounded and may not add precisely to the printed totals in the statistical tables which are based on unrounded figures.

This annual report covers my first full year in office. I believe that many of the actions taken this year by the Internal Revenue Service have provided and will continue to provide benefits to taxpayers.

Shortly after coming to the IRS, I appointed a group of senior IRS career executives to study, in detail, the IRS's organization and to make recommendations for change, if appropriate. The only direction I gave the group was that no change was to be considered which would decrease service to taxpayers or impair the effectiveness of the IRS. That group completed its work this year. As a result of its study and recommendations we either have implemented or are in the process of implementing the following changes:

- Functions involving service to the public have been separated from other functions at all levels of the organization — National, regional and district. The goal is to emphasize the independence and importance of service to taxpayers.
- Administrative and support services are being centralized within the various offices to increase efficiency and reduce overhead.
- We are streamlining our smallest district offices by eliminating a level of middle management and consolidating certain internal housekeeping functions into those of larger offices. Again, this move is designed to increase efficiency. No front line services to taxpayers are affected.
- We substantially modified our administrative appeals procedure. We have consolidated the former two levels of appeal — one at the district and one at the regional level — into a single administrative appeal structure at the

regional level. All appeals officers will have full settlement authority. We believe that this system will avoid delays and duplication and fully protect taxpayer rights. Appeals under this new system will continue to be heard at all locations where appeals formerly were heard at either level. We have established a new office of Regional Director of Appeals, which is independent of the district office responsible for the original deficiency recommendation.

This office also will handle appeals dealing with employee plans and exempt organizations, as well as disputes formerly handled by the Collection Division.

The Tax Reduction and Simplification Act of 1977 and IRS efforts to simplify the tax forms enabled more than 34 million taxpayers to file the shorter Form 1040A in 1978, an increase of 17.3 percent over 1977. At the same time, 53.2 million taxpayers — 6.1 percent fewer than last year — filed Form 1040. This shift in taxpayer filing patterns and the simplification of the forms were responsible for a 58-percent drop in mathematical errors made on the Form 1040A, and a 29-percent decline in mathematical errors on Forms 1040.

These forms reflected increased taxpayer involvement in their design. For example, this was the second year that we held informal public hearings on the tax forms. This year, hearings were held in Columbus, Ohio; Columbia, S.C.; Denver, Colo.; and Des Moines, Iowa.

We also conducted a survey of taxpayer reactions to the forms by inserting questionnaires in a small sample of tax return

4

packages. At our hearings and through the survey, taxpayers told us that they preferred that the forms remain unchanged. The 1978 individual returns follow line for line the 1977 returns. Therefore, we have hopes that error rates will decline even further next year.

We improved the accuracy of the assistance we provided to taxpayers seeking help. Through sampling we found that over 97 percent of our answers to phone calls were correct and, of the tax returns reviewed after IRS assistance was given, nearly 96 percent were error free. We are working constantly to achieve higher quality service to taxpayers through improved training of our assistants and more extensive quality control.

All taxpayers are entitled to assurances that the tax laws are administered evenhandedly and that all are paying their fair share. Our compliance activities seek to give that assurance.

We have become increasingly concerned in recent years about the proliferation of tax shelters, many of which seemed to take positions well beyond a reasonable interpretation of the tax law. Therefore, during 1978 we doubled our audit coverage of partnership returns and concentrated resources on those returns which show substantial losses and where tax shelters are likely to appear.

Abusive shelter deductions increasingly have appeared on individual returns not involving partnerships. We have taken immediate steps to identify such returns for review. We also have undertaken a longer range project to change, for purposes of audit selection and audit coverage, the classification of individual returns, from one based on adjusted gross income

to one based on total positive income. Returns with high incomes and high losses will have a low adjusted gross income but, because of their complexity, should be treated as high income returns. The new system will do so.

We know that there are taxpayers willing to gamble that their returns will not be examined and, even if they are, that certain issues will not be uncovered. To shorten the odds on this "audit lottery," we have added questions to tax returns that will help us select the most appropriate returns for audit and also help our examiners determine areas on the return for special attention. We are continuing to study the problems which we believe this audit lottery presents to a self-assessment tax system.

The nation's largest corporations are examined under our Coordinated Examination Program, which involves audits by teams of specialists. This year we completed a study of this program, and as a

New York Times Photo

5

result we are implementing several changes. We are changing the criteria for selection of those corporations to be examined under the program from a determination based solely on gross assets to considerations involving a number of factors so that our team resources may be used more effectively. Other changes include new training programs for these employees and greater specialization by industry.

As the fiscal year closed, Congress was considering tax and energy legislation, some provisions of which would affect 1978 tax returns. In light of the possibility of late legislation, the IRS delayed the printing of individual tax packages well beyond the scheduled time. Only by the extraordinary efforts of many dedicated employees were we able to reflect this legislation in the forms and instructions for taxpayers, expedite massive printing and distribution tasks and get almost all the tax packages to taxpayers on time.

Over the past two years, the number of tax returns filed increased by 6.6 percent. During this same period, employment staff years at IRS increased less than one percent.

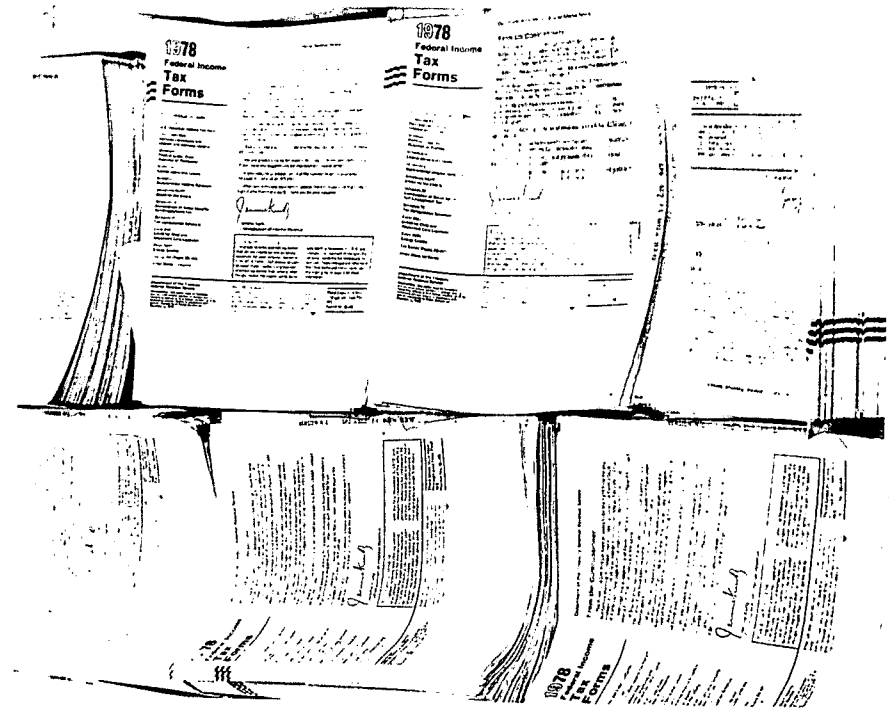

Administering our tax laws is an enormously complex task, one which is handled with a high degree of efficiency, sensitivity and integrity by the 85,000 career Civil Service employees of the Internal Revenue Service.

This report summarizes the results of their efforts.

Jerome Kurtz

Jerome Kurtz
Commissioner of Internal Revenue

Collecting the Revenue

Returns Processing

IRS service centers received 136.7 million tax returns of all types in FY 1978 compared to 133.5 million in 1977. Of the returns received in 1978, over 89.1 million were individual and fiduciary income tax returns as compared to 87.3 million in 1977.

Number of returns filed, by principal type of return
(Figures in thousands. For details, see table 7, in Appendix)

Type of Return	1977	1978
Grand Total	133,522[*]	136,718
Income Tax, Total	98,772[*]	100,775
Individual	85,608 [*]	87,386
Declaration of estimated tax	8,088	8,103
Fiduciary	1,663	1,732

Alcohol, Tobacco and Firearms	564[*]	552
Excise Tax	910	908
Supplemental Documents	5,877	6,827

^{*} Data revised from previous annual report.

After several years of increase up to 1977, the number of Form 1040 filers decreased this year while the ranks of Form 1040A filers continued to grow. The shift from Form 1040 to the shorter 1040A was due to the simplification of the form and its increased availability made possible by the Tax Reduction and Simplification Act of 1977 and to a greater effort to mail the Form 1040A to taxpayers who had used the 1040 in 1977 but were eligible to file the

shorter form. The Service received 53.2 million Forms 1040 in 1978, 6.1 percent less than the 56.5 million received last year. More than 34 million individual taxpayers, 39 percent of all individual filers, used the Form 1040A, compared to over 29 million in 1977, an increase of 17.3 percent.

Mathematical Correction

The IRS checked the mathematics on 87.6 million individual returns. As a result, 2 million taxpayers had decreases in the liability shown on their returns totaling \$309 million, an average of \$152 per return, resulting in larger refunds or smaller tax due. On 3.4 million returns, correction of taxpayer errors increased their tax liability by \$791 million — an average of \$235.

Error rates for Forms 1040A processed dropped dramatically from last year. In 1977, 12 percent of all Forms 1040A processed over the same period had mathematical errors as compared to 5.1 percent for 1978. Error rates for the

redesigned Form 1040 fell from 9.1 to 6.5 percent in a tally at the close of the annual filing period.

The decrease in math errors was mainly attributable to changes made by the Tax Reduction and Simplification Act of 1977 and the redesign of the Forms 1040 and 1040A. The new forms eliminated the need for many taxpayers to calculate their taxes, which was the cause of numerous errors in previous years.

Gross Internal Revenue Collections (Dollars in thousands. For details see table 1 in Appendix)

¹ Collections are adjusted to exclude amounts transferred to the Government of Guam.

² Estimated Collections of individual income tax withheld are not reported separately from old-age, survivors, disability and hospital insurance (OASDHI) taxes on wages and salaries. Similarly, collections of individual income tax not withheld are not reported separately from OASDHI taxes on self-employment income. The amount of OASDHI tax collections shown is based on estimates

The Service also checked the credit claimed for estimated tax payments. The verification showed that taxpayers under-claimed \$259 million in estimated tax credits and overclaimed by \$474 million.

Receipts

Gross revenue collections amounted to \$399.8 billion, an increase of \$41.6 billion (11.6 percent) over 1977. All major tax categories except estate and gift taxes

made by the Secretary of the Treasury pursuant to the provisions of sec. 201(a) of the Social Security Act as amended, and includes all OASDHI taxes. The estimates shown for the two classes of individual income taxes were derived by subtracting the OASDHI tax estimates from the combined totals reported.

³ Includes Presidential Election Fund amounting to \$36,640,491.

⁴ Includes Presidential Election Fund amounting to \$39,077,131.

showed an increase. Factors contributing to this year's collection picture were higher personal income, higher corporate profits, and increases in the social security tax rate and base.

Income taxes accounted for over two thirds of all tax receipts. Individual income taxes amounted to \$213.1 billion, a gain of \$26.3 billion (14.1 percent) over the prior year. Corporation income taxes collected were \$65.4 billion — up by \$5.3 billion (8.9 percent).

Employment taxes — social security, self employment, federal unemployment, and railroad retirement — totaled \$97.3 billion, advancing \$11.2 billion (13 percent). This increase reflected a higher level of wage and salary payments, increases in the

amounts subject to social security and unemployment taxes, and an increase in the social security rate.

Excise taxes registered the smallest advance of any major tax category, rising \$800 million (4.7 percent) on collections of \$18.7 billion. Much of the gain was generated by excises related to autos and air transportation. A new excise tax on coal to finance the payment of black lung benefits to miners was effective April 1, 1978.

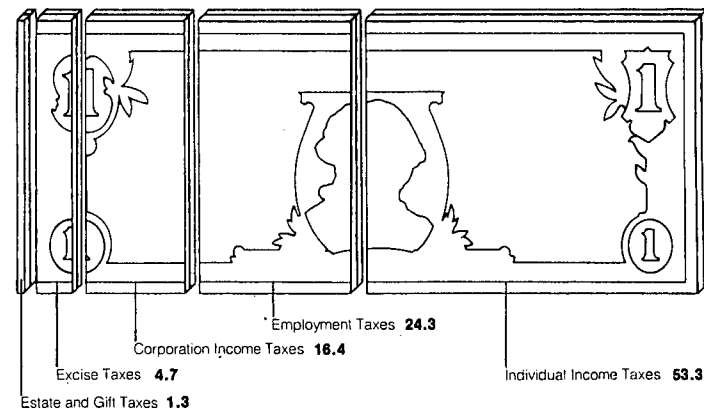

Estate and gift tax collections registered the only decrease, falling \$2 billion (27.5 percent). The decline was from last year's abnormally large gift tax receipts caused by the pending estate and gift tax revisions of the Tax Reform Act of 1976.

Net Internal Revenue Collections
through September 30, 1978
(Dollars in thousands)

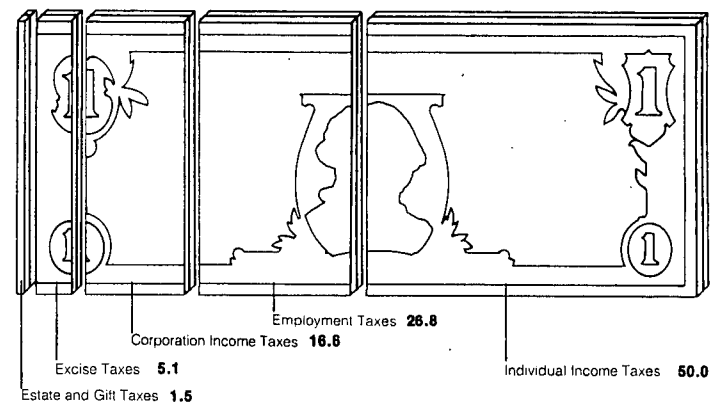

Source	Net Collections			Percent of Total

Fiscal Year 1978 (Gross Collections)

The Tax Dollar
Where It Came From
Fiscal Year 1978 (Net Collections)

Pipeline At the ten Regional Service Centers

Envelopes are opened and counted.

Returns are sorted by type of return.

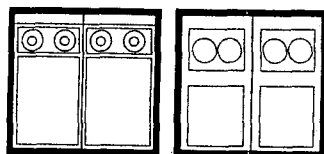

Tax returns and accompanying checks are compared.

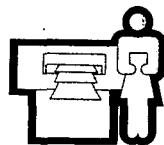

Returns are edited and coded for computer processing.

Tax return information is fed into the computer.

IRS computers perform validity checks on tax returns.

Refund checks are printed by Treasury Department Disbursing Center.

Once a tax return reaches one of ten IRS Service Centers, it travels through a series of processing steps known as "the pipeline." While many parts of the pipeline

shown here are automated for faster processing and faster refunds, people are involved every step of the way.

Refunds

The IRS paid refunds totaling \$39.6 billion to 69 million taxpayers whose income tax withholding, estimated tax payments or credits were shown on their returns to have exceeded their tax liabilities. The average refund to individuals was \$495. This year's individual refunds included 4.3 million checks totaling \$900 million for the Earned Income Credit (EIC). In 1977, 67.9 million individual refunds totaling \$36.5 billion were paid, with 4.4 million checks totaling \$900 million in EIC.

Penalties and Interest

The IRS under law can levy penalties such as those for failure to pay tax due, bad checks, delinquency, negligence, and fraud. More than 15 million penalties totaling \$1.3 billion were assessed with 1.4 million of these amounting to \$336 million abated. Almost half of the penalties

were for individual returns. For detail, see Statistical Table 13.

The Service also is required to assess interest against taxpayers who fail to meet filing requirements. More than \$85 million in interest was assessed on individual returns this year of which \$4 million was abated. For business returns, interest assessed was \$759 million with abatements of \$95 million.

Interest paid this year amounted to \$108 million for individual and employment taxes and \$198 million for corporations. Details are shown in Statistical Table 7.

Tax Credits

One of the provisions of the Tax Reduction and Simplification Act of 1977 was the New Jobs Credit. This is a nonrefundable credit available to employers meeting certain criteria in the hiring of new employees in 1977 and 1978.

*Returns processed by National Computer Center and scheduled for issuance by Regional Disbursing Centers include only Forms 1040 and 1040A.

Again this year a credit for child care expenses was available for working parents and income credits were offered taxpayers meeting certain income and dependency criteria.

The accompanying table shows tax credits for January through September 1977 and 1978.

		1977	1978
New Jobs Credit	No.	—	536 thousand
	Amt.	—	\$1.7 billion
Child Care Expense Credit	No.	2.7 million	2.9 million
	Amt.	\$0.5 billion	\$0.5 billion
Earned Income Credit	No.	6.2 million	5.6 million
	Amt.	\$1.2 billion	\$1.1 billion

Presidential Election Campaign Fund

A total of 24.9 million individual income tax returns had designations for the Presidential Election Campaign Fund in 1978 — 28.9 percent of the returns processed during that period. The amount designated was \$39.1 million. In 1977, there were 23.2 million individual tax returns — 27.5 percent of those processed — with designations totaling \$36.5 million. The cumulative amount credited to the fund since it was initiated in 1972 is \$171.5 million.

Automated Information Filing

The IRS received nearly 484 million information returns from businesses and organizations required to report payments of wages, interest, dividends and other payments. Over 265 million of these documents were submitted on magnetic media as a result of the Service's continuing program to encourage payers that have computer capability to do so.

Of the information returns received, almost all of those filed on magnetic media that report income paid to individuals and approximately 15 percent of those on paper will be matched against the master file.

The accompanying table shows the number of organizations shifting to magnetic media filing during the past decade.

Combined Annual Wage Reporting

Combined Annual Wage Reporting (CAWR) is a new system for reporting employee wage data which has been developed to reduce the reporting burden for employers. This new system will satisfy the reporting requirements of both the IRS and the Social Security Administration (SSA). CAWR became effective for all wages paid after Dec. 31, 1977. Under CAWR the requirement to file Schedule A with employment tax Forms 941 and 943 became obsolete and the Form W-2 was redesigned to transmit the Federal Insurance Contributions Act information formerly filed on Schedule A. The Forms W-2 are to be filed with the SSA which will transcribe the information and supply it to the IRS.

By eliminating Schedule A, the President's Advisory Council estimated an annual savings to employers of \$235 million.

Information Returns Reported on Magnetic Media

Assisting the Taxpayer

Call, Walk In or Write

The Service provides taxpayers with comprehensive information about the tax system and their responsibilities and rights under it. Aware that the process of determining income, exemptions, deductions and correct tax can be difficult, the IRS provides direct assistance through personal contact, by telephone and by correspondence.

During 1978 the IRS received about 93,000 written, 28 million telephone and 9 million walk-in inquiries. More than 63 percent of these inquiries occurred from January 1 through April 29, 1978 — over 17 million phone calls, more than 6 million walk-in inquiries, and over 38,000 written inquiries, almost 24 million requests for assistance. Of these filing period inquiries — telephone calls and prepared returns — over 196,000 were reviewed as part of the quality review system. This review indicated an overall national accuracy rate of 97.5 percent.

Services

Filing period walk-in taxpayer assistance was offered at about 690 permanent offices and at 200 temporary offices set up for the

filing period. These offices were located in the inner city, business districts, and suburban and rural areas. When possible, hours of service were extended for taxpayers unable to call or visit during normal business hours. Most taxpayers were required to wait less than half an hour and more than half waited less than fifteen minutes for assistance.

The IRS continued to provide bilingual service to taxpayers who do not speak English. Of approximately 890 taxpayer service offices, 207 offices had tax assistants who spoke foreign languages. Spanish assistance was provided by 487 employees and 515 employees assisted in other foreign languages. Bilingual taxpayer assistance also was provided through a questionnaire, translated into Spanish, Chinese and Vietnamese, that was issued to taxpayers who could not communicate in English. Over 35,000 banks and Postal Service locations helped distribute more than 250 million tax forms and instructions.

Toll-Free Phones

IRS toll-free telephone service continues to reach more taxpayers with greater efficiency than any other method of assistance. Almost 97 percent — 17.2

million — of the telephone calls received during the 1978 filing period were on the toll-free system.

The toll-free system brings IRS offices as close to taxpayers as their phones. By using this system — without paying a long distance charge — taxpayers anywhere in the U.S. may call the IRS for assistance or clarification of bills or notices received. Toll-free numbers are listed in the tax packages and are also publicized to alert taxpayers to this service.

During this filing period calls answered by TV phones and teletypewriter service for the deaf increased by four percent. This special service has a nationwide toll-free number, excluding Alaska and Hawaii, staffed by the Indianapolis District. As a result, hearing impaired taxpayers have access to services similar to those offered other taxpayers.

Educating Taxpayers

This year marked the tenth year of the IRS Volunteer Income Tax Assistance (VITA) Program. Through this program the Service attracts, recruits and trains volunteers to offer free tax assistance to low income, elderly or disadvantaged taxpayers at convenient locations and times. Approximately 30,000 volunteer assistants were trained by the Service as part of the VITA program — a 50 percent increase over last year.

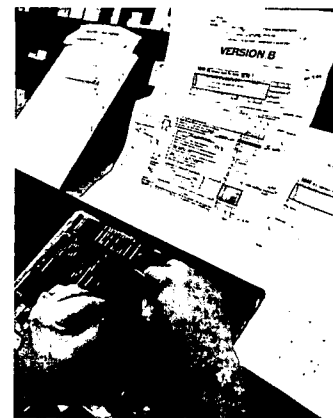

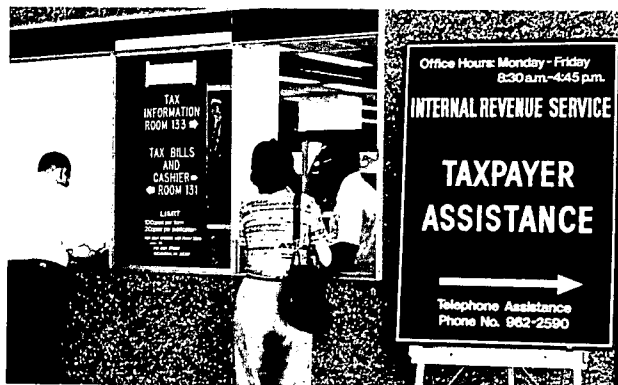

The Service's taxpayer education program sponsored over 4,000 classes for about 200,000 individuals. Additionally, in the school programs, "Understanding Taxes" and "Fundamentals of Tax Preparation," about five million tax course books were distributed to high school and college level students throughout the country.

The refresher income tax law course also was revised and made more flexible by leaving the districts free to select a number of tax law topics based upon local quality review statistics.

Simplifying the Forms

The last-minute congressional preadjournment flurry of activity produced the year's most important legislation for the IRS, the Revenue Act of 1978 and the Energy Act of 1978. The problem faced by the IRS was to reflect these late changes in the law in the forms and instructions being designed and printed for 1978 so they could be available for taxpayers in time.

Despite problems created by late legislative changes, simplification efforts continued. This year's efforts focused on rewriting and redesigning the instructions for Forms 1040A, 1040 and related schedules. The instructions now have a 9th grade

readability level compared to a 13-14 grade level two years ago, with graphic design changes also improving the instructions. The changes include opening up vertical spacing between sections and paragraphs to ease crowding, using an irregular right hand margin to maintain natural word spacing and introducing bolder primary headings and subheadings for emphasis. Another significant improvement is the explanation of items, line by line, in the instructions.

But simplification efforts were not limited to the Form 1040 family. The instructions for Form 941, Employer's Quarterly Federal Tax Return, were rewritten and *Circular E, Employers Tax Guide*, is being rewritten, both to improve readability. In addition, after the Service requested comments on a simplified Form 940, Employer's Annual Federal Unemployment Tax Return, a new Form 940 was developed which eases the computation of unemployment tax for over 90 percent of filers.

Form 5329, Return for Individual Retirement Arrangement Taxes, and Form 5500-K, Annual Return/Report of Employee Pension Benefit Plan for Sole Proprietorships and Partnerships also were revised. The 1978 Form 5329 will need to be filed only by individuals who owe one of three individual Retirement Arrangement taxes on excess contributions, premature distributions and certain accumulations in IRA accounts or annuities.

Form 5500-K no longer is required for plans in which an owner-employee is the only participant in 1978 and all previous plan years, nor is it required for partnerships when the only plan participants are partners who own more than a 10 percent interest in either the capital or profits of the partnership.

In July the General Accounting Office issued a report entitled, "Further Simplification of Income Tax Forms and Instructions Is Needed and Possible." The report stated that although the IRS has

progressed in making the forms and instructions easier to read and understand, more can be done. GAO suggested that the IRS establish a high-level task force to improve the forms. This task force, consisting of the Commissioner, Deputy Commissioner, and several Assistant Commissioners, has met and is developing a plan of operation.

Also, public hearings on the forms were held in Denver, Colo.; Des Moines, Iowa; Columbia, S.C., and Columbus, Ohio. Although many of the suggestions will help to improve the 1978 tax forms under existing law, others require change in the law.

Publications

Continuing a policy adopted in recent years, the IRS distributed a number of publications free of charge. During this year, 3.1 million copies of Publication 17, *Your Federal Income Tax*, were distributed, along with 1.1 million copies of Publication 334, *Tax Guide for Small Business* and 830,000 copies of Publication 225, *Farmer's Tax Guide*. Additional tax materials including tax return forms were furnished

on request to over six million individual taxpayers, 600,000 tax practitioners and 360,000 employers.

Besides the three comprehensive tax guides, the IRS issues over 80 smaller publications concerning specific topics under the income tax, excise tax, exempt organizations, pensions and annuities, and estate and gift tax statutes.

Three of the publications were written in Spanish — Publications 579S, 556S, and 586S — explaining basic rules about preparing and filing a tax return, taxpayer rights if a return is examined and the taxpayer's payment responsibilities if additional tax is due.

Graphic Arts Cited

The IRS publishes a variety of publications to assist taxpayers. Since much of the information that must be explained is complex, considerable effort is made to produce publications written and designed to communicate effectively.

A long list of design awards won in recent years attests to the success of this effort. In 1978, for example, the taxpayer information publication *Farmer's Tax Guide* and the *Understanding Taxes* student text and announcement poster were selected for the annual Art Director's Club exhibition in Washington, D.C. The *Understanding Taxes* student text received a Silver Medal Award for design excellence.

Information Dissemination

The IRS relies heavily on the mass media to inform the public about its operations and to explain tax laws, regulations, rulings and procedures. During 1978 material was sent to 16,067 radio and TV stations, daily and weekly newspapers, magazines and special publications. Additionally, IRS personnel participated in 16,158 interviews and answered 18,568 media inquiries.

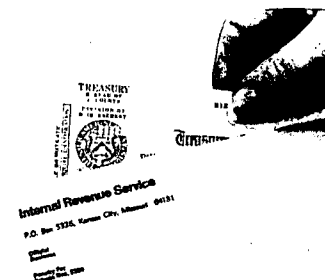

The IRS issued 4,901 news releases to the media covering substantive technical and procedural matters, tax forms and publications, statistics, speeches by IRS officials

on important tax topics and organizational changes. There also were releases to assist taxpayers in meeting due dates and properly filling out forms and in understanding their rights and responsibilities under the tax law.

Four IRS half-hour color films presented information on the American tax system, audit and appeal rights and responsibilities, tax aspects of running a small business and how to prepare a tax return. These films, two of which also were released in Spanish, appeared 514 times on TV across the nation and 3,045 times before professional, trade, civic, educational and other groups.

"Where's My Refund?"

In an effort to respond more timely to taxpayer inquiries about not receiving a refund, the IRS, in 1978, began to put all these requests on magnetic tape before forwarding them to the Bureau of Government Financial Operations. Additionally, all inquiries for nonreceipt of refunds are now monitored by the Integrated Data Retrieval System to improve responses and to eliminate duplicate follow-up action.

Resolving Problems

Under the Problem Resolution Program (PRP), the IRS attempts to resolve taxpayers' complaints not satisfied through normal channels and to identify systemic and procedural problems needing correction. During 1978 approximately 66,000 taxpayer problems were resolved through PRP.

The program was continuously reviewed this year with procedures rewritten to provide more uniformity and visibility and to expand PRP to service centers. Many systems and procedural changes have resulted from PRP, improving IRS efficiency and responsiveness to the public.

A major success of the program has been the establishment of liaison with other government agencies to assist in the resolution of taxpayer problems, such as lost and stolen refund checks, and internal processing problems, such as incorrect social security numbers.

Making Information Available

Reflecting the IRS's attitude that responding promptly to requests for information and documents under the disclosure laws and the Freedom of Information and Privacy Acts is an important part of service to the public, the Disclosure Operations Division and its field counterpart were moved from the Compliance function to the

Office of the Assistant Commissioner (Taxpayer Service and Returns Processing). During Calendar Year 1977, 7,913 requests were received for documents not available in IRS Freedom of Information Reading Rooms. Of these 5,438 were granted in full and 748 in part. The National Office Reading Room responded to 18,415 requests for information.

The IRS received 738 requests for access to records under the Privacy Act of which 475 were granted in full and 95 were granted in part. Only 10 requests were received to amend records.

The IRS increased its efforts to maintain the confidentiality of tax returns and return information by increasing disclosure training for employees, beginning an annual review of safeguards of other federal agencies that are entitled under the law to obtain confidential tax information and by implementing recordkeeping and reporting requirements for the disclosure of tax returns and return information.

The Tax Reform Act of 1976 revised the disclosure provisions in the tax law by considerably restricting the circumstances under which, and the methods by which, federal agencies may obtain tax information for nontax purposes. It also requires that those who have access to such information maintain safeguards for its protection. Federal tax information received by states may be disclosed only to state agencies charged with administering state tax laws, upon request of the head of the state tax agency. A new provision permits disclosure of tax information to federal, state and local child support enforcement agencies for the purpose of collecting child support obligations. Among disclosures made in this year were 3,148 to the Department of Justice, 35,249 to child support enforcement agencies and approximately 80,000,000 to state tax agencies.

The exchange of confidential tax information with the states is intended to increase tax revenues, reduce duplicate audits and increase taxpayer compliance. IRS field disclosure officers visit each state tax agency semiannually to check on the adequacy of their systems for safeguarding

the confidential information provided to them. All federal/state agreements on coordination of tax administration that were in effect before enactment of the Tax Reform Act of 1976 were amended. There are now 97 agreements in effect.

Preparer Ethics

The Tax Reform Act of 1976 requires tax return preparers to conform to general conduct standards and to follow specified disclosure and reporting rules. The Act also provides penalties ranging from \$25-\$500 for noncompliance with the law and regulations to help protect the public from certain questionable practices and abuses in the preparation of tax returns.

The IRS has taken several steps to inform the public — specifically the preparer community — of the provisions of the Act. Proposed instructions for preparers were printed in informational forms packages, a new question-and-answer publication was issued, a letter was sent to all preparers of record and various news releases and information letters were distributed with specific examples of practitioner errors, particularly those concerning the correct reporting of identifying data. As a result, about 95 percent of all tax returns and claims for refund filed had the correct identifying data.

Helping Other Countries

In 1963 the IRS, through the Tax Administration Advisory Services Division (TAAS), in cooperation with the Agency for International Development (AID), initiated a program to assist foreign governments in modernizing their tax administration systems. IRS advisors have been assigned to thirty-seven countries, the Caribbean Community and the Central American Secretariat for Economic Integration for periods from two weeks to several years. Funding is provided by AID, the recipient countries or international agencies.

This year long-term assistance programs were completed in El Salvador, Uruguay, Trinidad and Tobago and on-site projects were initiated in Egypt, Liberia, Jordan,

the Northern Mariana Islands and the Trust Territory of the Pacific Islands. New projects are pending for El Salvador, Sierra Leone and the Caribbean. Also, diagnostic surveys were completed in Nicaragua, Egypt and Jordan, and a follow-up assessment was made of the Trinidad and Tobago project.

Since 1963 over 5,000 visitors from 127 countries have visited the Service for orientation and study observation programs. This year 387 officials from 66 countries participated.

There was an increase in the number of representatives from France, Italy, and the United Kingdom who were interested in IRS automation, organizational structure and the voluntary compliance, self-assessment system. There were also frequent exchange visits between Canadian National Revenue and IRS officials.

The IRS presented a seven week middle management seminar in tax administration for tax officials from six countries and a six-week orientation in automatic data processing, sponsored by the Organization for European Community Development. Participants in Harvard's International Tax Program, two International Monetary Fund public finance groups, and a group of high

level Nigerian civil servants, sponsored by Brookings Institution, also visited the IRS.

The IRS participated in the 26 member country Inter-American Center of Tax Administrators' (CIAT) Twelfth General Assembly in Port of Spain, Trinidad and Tobago, in May 1978 where the Commissioner made a presentation on, "Developing Tax Laws, Administrative Rules, and Procedures for Resolving Taxpayers' Disputes." Through CIAT, the IRS provided automatic data processing and systems analysis help to the Dominican Republic, Honduras and Guatemala. The Director of TAAS finished his term as a member of CIAT's Executive Council and the Assistant Commissioner (Data Services) served as a member of the ADP Advisory Committee.

State, Local and Campus

TAAS has coordinated 32 assignments to 10 states, Puerto Rico, Guam, the Virgin Islands and the University of Southern California, under the Intergovernmental Personnel Act of 1970 (IPA).

Earned Income Credit

The IRS continued to alert the public about the Earned Income Credit (EIC), which benefits low income taxpayers. With the cooperation of other federal agencies, such as the Departments of Health, Education and Welfare, Agriculture and Labor, we sent special notices to those considered eligible for the Earned Income Credit. Also, nearly 1 million notices were sent to taxpayers who filed returns without claiming the EIC who possibly qualified according to their tax return information. As a result, nearly 452,000 additional claims for the EIC were allowed.

During January 1 through September 30, approximately 5.6 million taxpayers claimed the EIC for a total of approximately \$1.1 billion, averaging out to nearly \$203 per taxpayer. Individuals who filed returns only to claim the EIC received almost 6 percent of these credits.

Enforcing the Law

Examinations

When returns are filed they are reviewed by IRS employees and computers. They are first checked manually for completeness and for such obvious errors as the claiming of a partial exemption or duplicate deductions. Then the IRS computers check the taxpayer's arithmetic and pick up other errors that may have escaped manual detection.

How Returns Are Selected

The IRS examines returns to help ensure a high degree of voluntary compliance. The primary method used by the IRS in selecting individual returns for examination is a computer program of mathematical formulas — the Discriminant Function System (DIF) — that measures the probability of error. Returns selected by the DIF system are screened manually and those confirmed as having the highest potential of error are assigned for examination. New DIF formulas for individual returns were developed in 1978 and will be used for returns filed in 1979. Since DIF was introduced in 1969 the number of individual taxpayers whose examinations resulted in no tax change has been reduced from 43 percent in 1968 to 24 percent indicating the superiority of the DIF selection system over manual selection for most returns.

Returns may also be selected for examination under the Taxpayer Compliance Measurement Program, a system that makes a random selection of returns which is a statistical sample of the classes of taxpayers being examined. Examinations under this program are more intensive because the results are used to develop information required for research purposes, such as the measurement of compliance and to update DIF formulas. Compliance measurement is an important factor in determining audit coverage of different classes of taxpayers.

Computer selection of returns is complemented by manual selection. For example, if the IRS examines a partnership return, the returns of the partners also may be examined. Returns of shareholders and executives may be examined in connection with the examination of their corporation. Other returns may be selected based on information documents filed by payers of wages, dividends and interest. The IRS also screens returns with adjusted gross income above certain amounts and some returns of taxpayers who submit claims for refund or credit after filing returns.

Examination Results

The IRS examined 2,328,812 tax returns of all types in 1978. Of those, 169,390 were examined in service centers, compared to 150,730 last year, an increase of 12 percent. The remainder were examined in district offices by revenue agents and tax auditors.

Examinations conducted by revenue agents at the taxpayer's place of business or residence covered 728,253 returns, an increase of 27,450 returns or 4 percent from last year. There were 1,431,169 returns examined by tax auditors under office audit procedures — a decrease of 66,507 returns or 6 percent from last year.

Examination coverage of income, estate and gift tax returns, excluding partnerships and Forms 1120S, was 2.28 percent compared to 2.46 percent in 1977. The coverage, including partnerships and Forms 1120S, was 2.29 percent compared to 2.44 percent in 1977.

An accompanying table shows returns examined in 1976, 1977 and 1978.

The Service's examination program resulted in approximately \$6.3 billion in recommended additional tax and penalties. The total recommendations include returns subject to appeal by taxpayers to the Appellate Division and the Tax Court.

Number of Returns Examined (Examination Divisions) Fiscal years 1976-1978

Type of Return	1976 ¹	1977 ¹	1978
Revenue Agents Total	746,329	700,803	728,253

¹Data revised from previous annual report.

Assessments totaled \$5 billion, \$4.1 billion in tax and penalties and \$913 million in interest. In 1977 assessments were \$3.4 billion in tax and penalties and \$650 million in interest. An accompanying table shows the recommended additional tax and penalties for 1976, 1977 and 1978.

Examiners are required to determine a taxpayer's correct liability and to ensure that taxpayers neither overstate nor understate their liability. Service examinations disclosed overassessments on 132,600 returns, accounting for refunds of \$312 million. In 1977 there were 122,003 returns with refunds of \$281 million.

Gross tax, penalties and interest resulting from direct enforcement
(In thousands of dollars)

Item	1977	1978
Additional tax, penalties and interest assessed, total	4,930,447	6,668,304
From examination of tax returns, total	4,084,135	4,993,858
Income tax, total	3,390,508	4,262,434
Corporation	1,982,748	2,690,597
Individual and fiduciary	1,407,760	1,571,836
Estate and gift tax	463,431	468,109
Employment tax (including withheld income tax)	173,150	203,288
Excise tax	57,047	60,028
From delinquent returns secured by Collection function	500,971	989,000
From delinquent returns secured by Examination function	345,341	685,446
Delinquent taxes collected, total	3,068,673	3,013,963

Service Center Program

The IRS service center review program, begun in 1972, generally is limited to the verification or resolution of issues that can be handled satisfactorily by service center personnel through correspondence with the taxpayer. There were 663,173 returns checked by the Examination Division in service centers in 1978 compared to 913,460 for 1977 — a 27 percent decrease.

Of those checked, 169,390 were examined, while the remainder, a total of 493,783 returns were verified and corrected, compared to 762,730 in the previous year. The decrease occurred primarily because of the continuing impact of the Tax Reform Act of 1976, which allows certain errors to be corrected during initial returns processing.

Computer Assisted Examinations

The Service uses computer programs in the examination of automated accounting systems used by taxpayers. Both taxpayers and the IRS save time and expense since computer procedures take a fraction of the time required to do the same job manually.

Over 12,000 computer applications were performed in 1978 — an increase of 2,000 over 1977. The applications are done by computer specialists who are experienced revenue agents with intensive training in computer systems, hardware, programming languages and examination techniques.

Coordinating Examinations

Financial institutions and utilities whose gross assets exceed \$1 billion are included in the Coordinated Examination Program. Other corporations are included in the program if gross assets exceed \$250 million.

Coordinated examinations involve complex accounting systems and the IRS uses teams consisting of experienced revenue agents, economists, computer specialists, engineer agents, international and excise tax examiners and employee plans specialists to examine these corporate returns.

Recommended Additional Tax and Penalties (Examination Divisions)

(In millions of dollars)

¹Data revised from previous annual report.

At the end of 1978 there were 1300 corporations in this program, with 3.2 open years per corporation.

During 1978 the IRS continued its practice of conducting industrywide examinations of major companies in a given industry. Ten industries currently are being examined by this approach and two more are in the planning stage.

Tax Shelters

In recent years, there has been a proliferation of limited partnership syndications using high-leverage borrowing together with special statutes to create tax deductions or losses that are lacking in economic reality. Through artificial transactions, questionable legal interpretations and other gimmicks, large purported tax deductions are developed and marketed by promoters to high-bracket taxpayers.

The IRS has been engaged in the vigorous pursuit of abusive tax shelters since 1973, with the establishment of a program that began with audits in the oil and gas industry. In 1974 and 1975, the program was expanded to include real estate, farming and motion picture shelters. Efforts have included identifying tax shelter cases, educating agents to recognize tax shelter issues, developing IRS position on key issues and identifying cases for early litigation.

An important element of the shelter program is the examination of partnership returns. For 1978, audit coverage of partnership returns in general was doubled from 1.5 percent to 3 percent. For partnership returns in the high-loss category, over \$25,000, audit coverage was approximately 24 percent. This, coupled with information obtained from the (SEC) and state agencies, and the use of computer programs to analyze, identify, and retain data on partners and partnerships, gives the IRS an improved capability to identify partnership returns which warrant examination.

To ensure compliance with the 1976 Tax Reform Act, the tax shelter program has been further expanded to include master

recordings, coal, books, lithographs and other areas identified as potentially abusive.

Joint Committee Review

The *Internal Revenue Code* requires that all income, estate, gift, private foundation and pension plan tax refunds and credits in excess of \$200,000 be reported to the Joint Committee on Internal Revenue Taxation. This year 978 cases involving overassessments of \$1.1 billion were reported to the Joint Committee, as compared with 997 cases and \$984 million in 1977.

Simultaneous Examinations

The IRS developed a working arrangement with the United Kingdom Board of Inland Revenue for simultaneous examinations of multinational taxpayers. This is the second such arrangement between the United States and another country — the first was with Canada in 1977.

Under this arrangement the United States and the United Kingdom separately examine taxpayers under their respective jurisdictions. Before an audit begins representatives of each country meet to plan and coordinate the examination. During each stage of the examination information is exchanged in accordance with the tax treaty between the countries.

Oil Industry

The IRS also implemented an oil industry program by forming an oil taxation unit in the Southwest regional office in Dallas, Texas. Among the unit's principal functions are making determinations and recommendations on certain issues; negotiating letters of agreement on these issues; coordinating selected industry issues and examination activities; developing pricing methods and examination techniques unique to the oil industry, and making industry analyses.

Enrolled Agents

The Special Enrollment Examination enables individuals who are not attorneys or certified public accountants to demon-

strate their competence in tax matters and become enrolled to represent taxpayers before the IRS.

The current examination, patterned after the CPA examination, is divided into four parts and emphasizes federal tax laws as they apply to business operations: sole proprietorships, partnerships and corporations. The questions focus on the tasks enrolled agents must perform to file complete forms and returns and to represent taxpayers before the Service. Candidates are required to pass each part though they may retain credit for any part passed and need only retake those parts failed.

In 1978, 5,425 candidates filed applications, compared to 5,090 in 1977.

Appeals

The IRS encourages the resolution of tax disputes through an administrative appeals system rather than litigation. A taxpayer who disagrees with a proposed change in tax liability is entitled to a prompt, independent review of the case. The appeals system is designed to minimize inconvenience, expense and delay to the taxpayer in resolving contested tax cases.

Before Oct. 2, 1978, district conference staffs were the first level of appeal in tax disputes between taxpayers and the IRS on issues arising from the examination of returns with a second appeal conference with the Appellate Division.

The two levels of appeals were independent of each other and had different authority and jurisdiction. Experience proved that this two-level appeals system was a costly duplication both for the taxpayer and the Service.

During 1978 all IRS appeals functions were consolidated into a single appeals body. Effective Oct. 2, 1978, these activities will be conducted by the Office of the Regional Director of Appeals in each of the seven IRS regions.

Proceedings in the appeals process are informal. Taxpayers may represent themselves or be represented by an attorney, a certified public accountant or other advisor enrolled to practice before the IRS. If the

disputed tax liability for each taxable year involved is \$2,500 or less, the taxpayer may obtain a conference without filing a written protest.

In most cases the taxpayers and the district conferee, or regional appeals officer, reached mutually acceptable agreements, so few cases went to trial. In the past 10 years, 97 percent of all disputed cases were closed without trial. In 1978 the appeals function disposed of 54,715 cases by agreement.

Docketed or Not

Cases considered by the Appellate Division fall into two broad categories: nondocketed and docketed. Nondocketed cases are those in which the taxpayer is protesting a proposed action by an IRS District Director involving additional taxes, a refund disallowance or a rejection of an offer in compromise. These cases made up about 54 percent of the Division's workload in 1978. Docketed cases involve situations where taxpayers have filed a petition for a hearing before the United States Tax Court.

In 1978, 70 percent of nondocketed cases and 73 percent of docketed cases were closed by the Division by agreement with the taxpayer.

Other Appeal Options

If a tax dispute cannot be resolved at the administrative appeals level, the taxpayer is advised of additional appeal rights to the courts.

If the disputed tax does not exceed \$1,500 in any tax year, a simple procedure is available under the U.S. Tax Court's small case procedures that permits informal hearings where taxpayers may present their cases before a special trial judge. Since a knowledge of courtroom proceedings is not required, an inexpensive forum for the taxpayer is provided. However, there is no provision in the law for an appeal of the Tax Court's decision under the small case procedure.

If a taxpayer chooses to bypass the Tax Court the tax deficiency may be paid and a claim for refund filed within two years from the date of payment. If the claim is denied or no action is taken by the IRS on the claim within six months the taxpayer may file suit for a refund in either a United States District Court or the Court of Claims.

A taxpayer may appeal an adverse decision of the Tax Court or District Court to the U.S. Circuit Court of Appeals having jurisdiction. Adverse decisions of the Court of Claims or a Circuit Court of Appeals may be appealed to the U.S. Supreme Court although not all such appeals are accepted.

The Tax Court tried 1,742 cases, and the United States District Courts and the Court of Claims tried 447 cases.

Criminal Investigation

The Criminal Investigation Division is responsible for investigating tax fraud and other criminal violations of the tax laws. The Division's enforcement activities are divided into a General Program and the Special Enforcement Program.

The General Program provides balanced criminal tax enforcement for various types of violations of the tax laws. Several

enforcement efforts, such as the questionable refund program and the Illegal Tax Protester Project, have been initiated to correct specific abuses of the tax laws.

The Special Enforcement Program covers the identification and investigation of persons who derive substantial income from illegal activities and violate the tax laws. The program includes strike force activities and a project on high level narcotics financiers and traffickers. In addition, the Criminal Investigation Division this year again began investigating violations of the federal wagering tax laws.

The Division completed 8,713 investigations and recommended prosecution of 3,439 taxpayers. Grand juries indicted or courts filed information on 1,724 taxpayers. Prosecution was completed successfully in 1,414 cases. Taxpayers entered guilty pleas in 1,056 cases, 133 pleaded *nolo contendere*; and 225 were convicted after trial. Acquittals and dismissals totaled 70 and 119 respectively. Of the 1,446 taxpayers sentenced during 1978, 681 or 47.1 percent received jail sentences.

The accompanying table covers the results of criminal action in tax fraud from 1974 to 1978.

Results of Criminal Action in Tax Fraud Cases 1974-1978

Action	Number of Defendants				
	1974	1975	1976	1977	1978
Plea of Guilty <i>nolo contendere</i>	1,062	1,046	977	1,229	1,189
Convicted after trial	191	173	216	247	225
Acquitted	97	83	77	55	70
Nol-prossed or dismissed	115	168	71	110	119
Total Disposals	1,465	1,470	1,341	1,641	1,603
Indictments & Informations	1,441	1,495	1,331	1,636	1,724
Percentage of Jail Sentences to Total Sentenced	41.6	40.3	41.5	44.7	47.1

Organized Crime

The IRS cooperates in the fight against organized crime by participating in the Federal Organized Crime and Strike Forces Program. Strike force units located in 13 major cities are headed by attorneys from the Department of Justice. The program objective is to coordinate the combined forces of federal law enforcement agencies against organized crime. The IRS is responsible for detecting criminal tax violations and for ensuring that the income from illegal activities is reported correctly and taxed. The IRS contributed 417 staff years of direct investigative and examination time to the strike force effort during 1978.

Under the program, 107 individuals were convicted or pleaded guilty to tax charges during the year and 582 prosecutions were pending when the year ended. Since the inception of the organized crime program in 1966, some 941 organized crime members and associates have been convicted or have pleaded guilty to tax charges.

As part of its Special Enforcement Program, the Service continued to identify and investigate significant tax violations by high-level narcotic financiers and traffickers. During 1978 the IRS completed 323 criminal tax investigations, obtained 65 indictments and achieved 56 convictions of financiers and traffickers.

Collection

The IRS has a Delinquency Prevention Program to identify potentially delinquent taxpayers and to assist them in maintaining compliance, and in preventing future delinquencies.

Nonpayment of taxes withheld from employees' wages is the most serious delinquency problem facing the IRS. The Trust Fund Compliance Program helps ensure that chronically delinquent taxpayers adhere to more strict filing and paying requirements, such as monthly rather than quarterly filing — and making deposits to a special bank account. Violations of certain requirements of the law can lead to criminal prosecution. Some 8300 taxpayers

were filing and paying their taxes monthly and 3,936 of these also were required to comply with the latest special bank account provisions of the law. During the first half of this year 75 taxpayers were convicted of criminal violations for not maintaining separate accounting for certain collected taxes.

The Service published "The Collection Process (Employment Tax Accounts)," a booklet explaining the rights and duties of business taxpayers and the IRS in the collection of employment taxes. The publication is sent to business taxpayers with their second delinquency notice or delivered by a Collection representative on initial contact. A similar booklet, "The Collection Process (Income Tax Account)," designed for individual taxpayers, was first published in 1974.

Collection representatives will enter into 60-day payment agreements with delinquent income taxpayers provided the taxpayer: — is unable to pay in full immediately; — has no record of prior delinquencies; — has only one currently delinquent account; — has a delinquency of not more than \$5,000, and, — agrees to full payment within 60 days.

If the taxpayer's financial condition indicates that immediate payment of an income tax in full would cause undue hardship, an IRS employee will help that taxpayer prepare a form itemizing monthly income and expenses to determine whether a payment agreement based on maximum ability to pay is in order. In certain cases IRS can arrange through a payroll agreement with the taxpayer's employer to withhold and regularly pay to IRS amounts deducted from wages.

Delinquent Accounts and Returns

The Collection Division disposed of over 2.3 million accounts receivable, including some 342,000 notices sent taxpayers who contacted IRS field offices to resolve the

delinquencies. Collection employees had to initiate contact on the remaining 1.97 million delinquent accounts.

Slightly more than \$3 billion in delinquent taxes was collected, with over 1.3 million delinquent return investigations and 108,000 returns compliance leads disposed of by Collection personnel in 1978. Approximately one million delinquent returns were secured, involving nearly \$989 million in additional assessments.

International Operations

IRS foreign operations are the responsibility of the Office of International Operations (OIO). The Service maintains permanent foreign posts and Revenue Service representatives at these stations are involved in compliance and taxpayer assistance activities and maintain cooperative contacts with foreign tax agencies.

Since OIO established its first office in Paris in 1948, the number of foreign posts staffed by Revenue Service representatives has increased to 14. Currently, posts in Bonn, London, Paris, and Rome cover Western Europe, and North Africa. Those in Mexico City, Caracas, and Sao Paulo are responsible for Mexico, Central America and South America, while Canada is serviced from Ottawa. Offices in Tokyo, Manila, Kuala Lumpur, and Sydney administer OIO activities in Japan, Southeast Asia, Australia and New Zealand. A post in Tehran covers the Middle East and the one in Johannesburg services Africa south of the Sahara.

This marked the 25th consecutive year that taxpayers received tax assistance abroad. Twenty-two assistants were detailed abroad during the year, providing assistance in 145 cities in 80 foreign countries. Approximately 151,000 taxpayers were assisted overseas and several hundred members of the armed forces attended five military tax schools held overseas. The armed forces participants then helped thousands of military personnel prepare their own tax returns.

Toll-free telephone assistance was expanded to all U.S. taxpayers in Puerto

Rico during 1978. Further, the Service entered into a tax administration agreement with Puerto Rico that along with agreements with American Samoa, Guam and the U.S. Virgin Islands allows the exchange of taxpayer return information and the development of mutual assistance programs.

U.S. Taxation Abroad

OIO is responsible for ensuring compliance with federal tax laws by U.S. citizens residing in foreign countries and by foreign entities doing business in the U.S. It is also concerned with U.S. businesses controlled by foreign interests and assists in the overseas examination of multinational corporations.

OIO examination and collection activities take place primarily in the U.S. However, OIO does send revenue agents and tax auditors abroad to examine the returns of taxpayers living overseas. Those collection cases that cannot be settled through correspondence are sent to the foreign posts for personal contact.

OIO also administers the social security laws in U.S. Possessions and Puerto Rico and the income tax laws for Puerto Rican residents on income from sources outside of Puerto Rico.

Treaties

Tax treaties with other countries are designed to eliminate double taxation, remove tax barriers to trade and investment and help curb tax avoidance. The U.S. now has income tax treaties with 39 countries and estate tax treaties with 13 countries.

In 1978 meetings were held with tax officials from several treaty countries to improve the administration of the treaties involved. These conferences improved working arrangements for more effective exchanges of information and for resolution of recurring problems that arise from conflict of U.S. and foreign tax laws.

A limited number of tax treaties provide for mutual collection assistance and OIO is playing an increasing role on a reciprocal basis in collecting taxes of these treaty partners from aliens in the U.S.

Employee Plans/Exempt Organizations

The Office of Employee Plans and Exempt Organizations (EP/EO) administers the regulatory responsibilities of the Service for employee benefit plans and tax exempt organizations. EP/EO field staffs are located primarily in the seven regional IRS offices and 19 key districts.

As a result of the reorganization of the IRS, the Office of the Assistant Regional Commissioner (EP/EO) was eliminated and its duties were transferred to the Assistant Regional Commissioner (Examination). The reorganization also transferred EP/EO's appeals procedures to the Office of the Regional Director of Appeals.

The Employee Plans activity administrators the Employee Retirement Income Security Act of 1974 (ERISA) with emphasis on developing regulations and procedures. IRS continues to coordinate the implementation of ERISA with the Department of Labor and the Pension Benefit Guaranty Corporation. As part of an effort by IRS to reduce the reporting burdens placed on taxpayers, plan sponsors and administrators are filing the 1977 annual return/report (Form 5500 series) only with IRS. In addition, a single computer system has been developed to provide return and data information needed by the three agencies.

A questionnaire mailout was developed in 1978 to survey employers who received determination letters before the enactment of ERISA but who failed to request a determination letter for their plans to conform to ERISA's requirements. The survey provides an estimate of the volume and expected receipt dates of determination letters and assists the Service in protecting the rights and benefits of plan participants.

Taxpayers have been encouraged to take advantage of IRS approved pattern, field prototype, model, master and prototype plans to reduce the expense and paperwork in complying with ERISA.

Some 7 regulations, 15 revenue rulings and procedures, and 25 news releases were issued, as well as 4,836 National Office opinion letters on master and prototype plans dealing with self employed plans, corporate plans and individual retirement accounts and annuities.

The IRS used an average of 854 field professional positions to carry out employee plans responsibilities. Advance determination letters were issued on the qualification of pension, profit-sharing and other employee benefit plans. Examinations were conducted to determine the qualification of plans in operation and to verify plan contribution deductions. During the year, 214,672 determination letters were issued on corporate and self-employed plans, an increase of 40 percent from 1977. The prohibited transactions activity closed 155 exemption cases, including 23 published proposed and final exemptions covering 116 individual cases.

On Aug. 10, 1978, the President submitted an ERISA Reorganization Plan to Congress, which was approved Oct. 13, 1978. The plan essentially will eliminate overlapping jurisdiction and duplication of effort in the administration of ERISA by separating the authority of the Treasury and Labor Departments.

The Exempt Organizations (EO) activity determines the qualifications of organizations seeking tax-exempt and private foundation status and examines returns to ensure compliance with the law. The number of active entities on the Exempt Organizations Master File increased from 789,666 in 1977 to 810,048 in 1978.

During 1978, 4 regulations, 55 revenue rulings and procedures, 264 technical advice memoranda, 19 announcements, 7 news releases and 8 publications were issued or revised. An average of 379 field professional positions were used to examine 17,238 exempt organizations returns. Also, 121 field professional positions and 97 National Office technical positions were used for 49,687 applications, reapplications and requests for rulings on proposed transactions from organizations seeking a determination of tax-exempt status or of the effect of organizational or operational changes on their status.

The IRS initiated a nationwide examination program on legislative and political campaign activities conducted by labor unions exempt under section 501(c)(5) of the *Internal Revenue Code* and trade associations and professional organizations exempt under section 501(c)(6) of the *Code*. The purpose of the program is to determine the extent of compliance with rules concerning the deductibility of dues paid to such organizations. The program, which will be completed during 1979, also will provide basic tax related information about the nature of these lobbying activities. More than 1,500 organizations were examined.

In August 1978 a proposed revenue procedure was published providing more definitive guidelines to determine whether certain private schools claiming tax exemption operate on a racially non-discriminatory basis as required by judicial decisions.

A system to identify exempt organization returns that may warrant examination was implemented in place of manual classification.

Basic principles and rules for uniform interpretation and application of the federal tax laws involving actuarial matters, are provided by the EP/EO Actuarial Division, which has 17 professional positions.

Managing the Tax System

Planning and Research

During 1978 planning activities included the preparation of the IRS Long-Range Plan and the development of a single, uniform structure for use in planning and zero base budgeting. IRS research activities included testing improved work technologies, development of testimony and other materials for presentation to congressional committees, analysis of pending legislation and a number of statistical and analytical projects to identify optimum program designs and objectives.

Reorganization

During the past year, Planning and Research provided guidance and support for organizational studies within the Office of Employee Plans and Exempt Organizations, the IRS Data Center, the Criminal Investigation Division, the IRS service centers and the Internal Security Division. A comprehensive assessment of the IRS led to significant revisions in operations, including a single level of taxpayer appeal system and the combination of all IRS taxpayer service and information activities into a single organization.

The Accounts, Collection and Taxpayer Service (ACTS) organization has been redesignated Taxpayer Service and Returns Processing. It now includes the taxpayer information activity which was formerly assigned to the Public Affairs Division, and the Disclosure Division, formerly part of Compliance. The Collection Division from the old ACTS organization has been shifted to the Assistant Commissioner (Compliance), consolidating all enforcement activities under a single authority.

Another change was the creation of a new unit at the district level to provide centralized administrative and support services. Previously, field operating functions had staffed and equipped their own support units.

The IRS's Administration organization was renamed "Resources Management." In addition to retaining the traditional Administration activities, such as training, admin-

istrative services, fiscal management, etc., Resources Management also is responsible for the new district office Centralized Services unit and for a new security function, formed to improve IRS safeguards of tax returns and other taxpayer records. The 12 smallest IRS offices were streamlined, eliminating some positions and drawing on nearby larger districts for administrative support and recordkeeping.

To more accurately describe their roles, "Audit" and "Intelligence" Divisions have been redesignated as "Examination" and "Criminal Investigation."

Studies

As a part of IRS's efforts to simplify tax returns and the tax filing process, a short questionnaire was included in a randomly selected sample of 1977 tax packages to identify aspects of the tax returns, instructions and schedules that taxpayers find difficult to understand. It also sought to determine how taxpayers try to overcome their returns preparation problems and solicited suggestions for simplifying the forms.

Among the 7,600 respondents, only 29 percent of 1040 filers and 11 percent of 1040A filers said that they had difficulty in understanding the tax returns or instructions. The tax computation portions of the tax forms were cited as causing the most difficulty. Most respondents said they cope with their preparation problems by re-reading the instructions. The survey results suggested that further simplification of the tax forms and instructions would not significantly alter the proportion of respondents who seek professional assistance.

IRS contracted with the Opinion Research Corporation of Ann Arbor, Mich., to determine the potential demand for free IRS return preparation services. The results of this survey will be used in a comprehensive review of the Service's current returns preparation policy.

The first IRS examination of the economic, social and behavioral factors that promote or discourage individual taxpayer compliance was undertaken in 1978. The Service awarded an 18-month contract to Westat

Corporation of Rockville, Md., to conduct a study to develop methods for measuring the impact of factors affecting individual taxpayer compliance. Once a working methodology is developed, further research will be conducted to apply the study findings to tax administration program evaluation and planning.

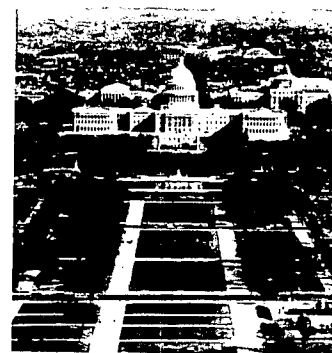

The IRS initiated a series of studies to determine how well taxpayers understand and comply with the approximately 85 provisions of law that permit the deferral of certain tax consequences to subsequent years. Some of the studies cover deferred gains on sales of personal residences, losses from activities not engaged in for profit, reductions of stock cost basis and the recapture of the new residence purchase credit if the residence is sold within three years of purchase. Other areas include deferred gains on installment sales, changes in accounting methods, at-risk loss limitations for various business activities, and generation-skipping trusts. The results of these studies will be used to determine the need for a system to track and better enforce individual taxpayer obligations under the deferred tax provisions.

There are civil penalties in the tax law for the violation of approximately 75 different rules governing the filing of tax returns, the timely payment of taxes due and reporting federal tax liability. The IRS began a review of these provisions to assess their fairness, effectiveness and administrability. Upon completion of the study, scheduled for Fiscal Year 1979, legislative recommendations may be developed. The study also will consider proposals for improving the administration of penalties and for monitoring their effectiveness.

Also during the year, a study was begun on the much publicized "subterranean economy" — income received by individuals but not reported on tax returns. This study is to evaluate all available estimates of a "subterranean economy," to present the IRS's best estimates of unreported income and tax gaps, and to discuss the findings in terms of future planning, research and compliance efforts. It will be completed during FY 1979.

Watching Legislation

Planning and Research is responsible for analyzing legislative proposals affecting the IRS and for determining their administrative implications. Once legislation is enacted, a plan for implementing each provision is developed and coordinated with those functions responsible for administering the legislation. Approximately 55 bills were analyzed for their impact on IRS activities and implementation plans were developed and carried out for 11 new public laws.

Productivity

A program was established to provide expanded incentives for promoting productivity at all IRS levels. The goal of this program is to improve efficiency by substituting investments in technology for staff, particularly in work processing, clerical and other routine operations. An important part of the program is a productivity enhancement fund for financing projects that improve procedures, techniques and equipment. IRS will prepare an annual productivity plan, hold productivity management seminars and improve work measurement systems.

Measuring Compliance

The Taxpayer Compliance Measurement Program (TCMP) is a continuing enforcement and research effort by which IRS estimates the nature and extent of tax law compliance. The TCMP data also are used to develop computer routines for selecting returns for examination. TCMP data are derived from examinations of tax returns selected on the basis of random probability samples.

During 1978 work continued on the first TCMP survey of fiduciary returns and on the sixth survey of individual income tax returns. Field examinations also were initiated for the third corporate TCMP survey. For the first time this survey was expanded to include corporate returns filed with no balance sheets, as well as those returns with assets up to \$10 million. Plans are now being made to initiate the first TCMP survey of employee benefit plans in July 1979 and a second survey of tax exempt organizations, beginning in January 1980.

Automating Examinations

For over five years, IRS has been operating a Computer Assisted Examination Program (CAEP), under which specially trained revenue agents examine the books and records that large corporations maintain on magnetic tape or disk files. IRS computer audit specialists have had to rely extensively on the use of taxpayers' computer equipment for developing and debugging software routines used in examinations. A 1978 study found that CAEP productivity would be enhanced substantially by providing computer audit specialists with terminals at their posts of duty to access a time sharing system upon which computer audit routines could be developed and tested. A plan to provide such a capability is now under development.

Optical Scanning

Recent developments in electro-optical technology have given rise to the possibility of using scanning equipment to record the data reported by taxpayers on their returns. During the past two years IRS tested the performance of this technology on machine prepared tax documents, such as Forms 1099 and 941, to determine what changes must be made in IRS forms and procedures before optical character recognition (OCR) can be used. Meanwhile, plans are being made to test the feasibility of OCR processing of Forms 1040A. During 1979 IRS also plans to conduct a joint test with the Treasury Department on the use of OCR to process Federal Tax Deposit forms that combine both machine and hand-written input.

Federal-State Test

The IRS is working with the National Association of Tax Administrators to promote the filing of Forms 1099 and 1087 information documents on computer tape. Under the test program—which will begin in Calendar Year 1979 using Tax Year 1978 information filed principally by institutional taxpayers in California, Minnesota, and New York — IRS will process the magnetic tapes, retaining information for federal tax purposes and simultaneously producing information for use by the states in whatever medium and format they require. This arrangement will reduce recordkeeping and filing requirements for taxpayers and accelerate the use of more efficient electronic media by both the IRS and state tax administrations. If the test is successful it will be a model for a similar arrangement among institutional filers, the IRS, the Social Security Administration, and the states in handling information from the Form W-2, withholding statement.

Publishing Statistics

The annual Statistics of Income (SOI) publications provide the public and the government with a variety of data reported

on income tax returns without violating taxpayers' rights to privacy. Nearly all of the data are estimates based on representative samples of returns.

Preliminary SOI publications in 1978 covered individual income tax returns for 1976 and corporation and business returns for 1975. As required by the Tax Reform Act of 1976, the 1976 report for individuals included statistics on the tax liability of persons with high total income computed by using several different concepts. Detailed statistics for 1975 and 1976 also were provided to Treasury's Office of Tax Analysis for a special publication on high income taxpayers.

An SOI supplemental report on individual income tax returns also was published, providing certain 1974 information for each county and for the 125 largest metropolitan areas.

Selected data from the SOI reports are shown in the accompanying tables.

Special statistical studies done for Treasury included information on sales of capital assets reported on individual income tax returns, the New Jobs Tax Credit introduced by the Tax Reduction and Simplification Act of 1977 and the foreign tax credit and tax exempt income earned abroad as reported on individual income tax returns.

Data also were provided to Treasury for reports to Congress on Domestic International Sales Corporations, U.S. taxpayers that participated in international boycotts and the revised system of taxing domestic corporations on their operations in Puerto Rico and U.S. possessions.

Statistics of Income publications may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Receipts and Profits Reported by Businesses, Income Year 1975

(All figures are estimates based on samples—number of businesses are in thousands—money amounts are in millions of dollars)

Industry	Number of businesses			Total receipts			Net income (less deficit) ¹		
	Active corporations	Sole proprietorships	Active partnerships	Active corporations	Sole proprietorships	Active partnerships	Active corporations	Sole proprietorships	Active partnerships
Total	12,024	10,882	1,073	3,198,627	339,221	148,418	142,636	44,611	7,738
Agriculture, forestry, and fishing	56	3,367	123	28,119	69,290	13,326	747	5,587	896
Mining	14	56	16	65,909	3,531	4,242	23,574	283	-500
Construction	191	892	61	146,955	31,013	12,572	2,236	4,389	794
Manufacturing	217	222	29	1,296,359	8,679	6,949	68,406	1,040	341
Transportation and public utilities	80	355	17	243,480	10,009	2,503	10,099	1,261	-25
Wholesale and retail trade	614	2,193	193	969,938	148,328	45,641	22,489	9,860	2,659
Finance, insurance, and real estate	411	744	434	315,795	12,138	32,406	11,663	3,762	-3,652
Services	436	3,034	199	131,377	55,997	30,765	3,398	18,385	7,224
Nature of business not allocable	2	19	(²)	692	238	14	23	44	1

Note: Income year 1975 covers accounting periods ended July 1975 through June 1976. Detail may not add to totals due to rounding.
¹ For sole proprietorships represents net profit reported on schedules C and F of individual income tax returns; for partnerships represents ordinary income; and for corporations represents, for the most part, taxable income before net operating loss and special deductions.
² Includes approximately 38,300 consolidated returns with 132,400 subsidiaries.
³ Less than 500.

Individual Income Tax Returns: Number of Returns, Sources of Income, and Itemized Deductions, 1972-1976
(All figures are estimates based on samples)

Item	Income year				
	1972	1973	1974	1975	1976
A. Number of returns	(Thousands)

Net capital gains	17,075	16,672	13,470	14,072	18,562
All other income	12,490	15,900	17,937	19,252	21,648
C. Itemized deductions	(Million dollars)				
Itemized deductions, total	96,665	107,035	119,406	122,261	133,891
Taxes	36,166	39,374	43,321	44,141	49,610
Interest paid	27,347	31,942	37,369	38,885	43,415
Contributions	13,208	13,896	14,851	15,393	16,792
Medical and dental expense	10,100	10,722	11,455	11,422	12,160
Other deductions	9,844	11,101	12,410	12,420	11,914

Note: Returns classified as taxable are those with income tax after credits or additional tax for tax preferences (minimum tax) or both.
Detail may not add to totals due to rounding.
¹ Includes returns with no adjusted gross income.

Tax Models

Developed in the early 1960's to meet Treasury's need for timely estimates of the impact and revenue effects of proposed tax legislation, tax models also have proved to be valuable tools for economic planning. Five basic models — individuals, corporations, sole proprietorships, partnerships, and estates — are revised each year to reflect changing levels and patterns of

income. Each model consists of generalized manipulation and table-generating computer programs, used with Statistics of income files containing the most current available year's tax return data.

Projecting Returns Filed

Planning throughout IRS is based on projections of the number of returns to be filed. This requires workload projections

Selected Types of Returns Filed in 1977 and Projected for 1978, 1979, 1980, and 1985, by Calendar Year
(Returns in thousands)

Type of return	Actual 1977	Esti- mated 1978	Projected			Percent change 1977- 1985
			1979	1980	1985	
Total Primary returns and supplementals	133,796	136,945	141,739	145,426	163,348	22.1
Total Primary returns	127,768	130,261	134,512	137,469	150,817	18.1
Individual total	85,753	87,710	91,224	93,600	104,077	21.4
Form 1040A	29,028	34,168	34,797	35,421	38,269	31.8

Total Supplemental documents⁸	6,028	6,684	7,227	7,957	12,531	107.9

¹ Includes Forms 1040NR, 1040PR, 1040SS, 1040C, and 1042.
² Includes Forms 1020, 1120 Special, 1120F, 1120-DISC, 1120-H, 1120-POL, and 1120S.
³ Includes Forms 940, 940PR, 941, 941E, 941PR, 941SS, 941M, 942, 942PR, 943, 943PR, CT-1, and CT-2.
⁴ Includes Forms 990, 990-C, 990-PF, 990-T, 4720, and 5227.

⁵ Includes Forms 5500, 5500C, and 5500K.
⁶ Includes Forms 7, B, 11, 4705, 4706, 4707, 4708, Alcohol, and Tobacco.
⁷ Includes Forms 11B, 11C, 720, 720M, 730, 2290, and 4638.
⁸ Includes Forms 1040X, 1120X, 2688, 4668, 7004, 7005, 2438, 990AR, 5300 Series, 4578 and 5329.

for the entire United States as well as for service center areas, regions and districts.

Special projections are made for research purposes. Work planning projections are updated each year to incorporate changes in the economic and demographic outlook as well as the effects of tax law changes and filing patterns.

The number of primary returns and supplemental documents is expected to grow from 133.8 million in 1977 to 163.3 million in 1985. This increase of 22.1 percent reflects the expected growth in population and economic activity.

Resources Management

Resources Management — redesignated from Administration under the reorganization — is responsible for fiscal management, personnel, facilities management, training, centralized services, employment policy, security standards and evaluation and management improvement.

Security

A Security Standards and Evaluation Division was established, consolidating responsibilities that previously were placed in several different organizations. The Division is responsible for a comprehensive Servicewide security program. The program provides reasonable protection for employees and protection against loss, destruction or compromise of tax and other protected information, facilities and property, data systems and other assets.

Equal Employment

Total full time regular employment from July 1977 through July 1978 increased by 2.9 percent, while the number of women increased by 5.9 percent and the number of minorities by 7.8 percent.

Women and minorities made gains in 19 of the 20 most populous IRS occupations, including revenue agent, revenue officer, tax auditor, attorney and criminal investigator. The number of women and minorities at grades GS-13 and above also increased — women from 3.8 percent to 4.5 percent and minorities in these positions from 5.4 percent to 5.8 percent — but more needs to be done.

Training to instruct special emphasis coordinators in programs for federal women, Hispanic employment, upward mobility and Blacks was developed and piloted. Also, about 100 EEO counselors received training in handling class discrimination complaints.

During the year the Service observed Black History Week as well as Hispanic Heritage Week and Women in Government Month.

Labor-Management

In mid-1977 the Assistant Secretary of Labor for Labor Management Relations ruled in favor of the National Treasury Employees Union's petition to consolidate their eleven center bargaining units into two nationwide units. One unit consists of all service centers — except Andover — the Data Center and the National Computer Center. The second unit consists of all districts — except Anchorage — and all regional offices — except the North-Atlantic appellate function and the Southeast Regional Office — and the National Office.

As a result of this consolidation the IRS revised its labor relations case handling procedures, strengthened its basic labor relations training courses to include a complete package in discipline, adverse actions and appeals, and improved its communications between the field and the National Office.

There has been an increase in the Unfair Labor Practice caseload along with a continued upward trend in grievance activity. The IRS republished the agency grievance procedure in handbook form and substantially revised its grievance examiner training course.

Paraprofessional Savings

The IRS has substituted approximately 1,400 paraprofessional positions for higher graded professional and technical positions over the past several years. This was done by splitting off the less complex work present in higher graded professional and technical positions and assigning it to paraprofessional employees at lower grades. This resulted in a savings of approximately \$8 million in salary and benefit costs. In addition to the recurring dollar savings, paraprofessional positions also increased the effectiveness and productivity of the IRS's professional and technical employees enabling them to spend more time on higher level work.

Paraprofessional positions have been established in Examination, Collection, Inspection, Criminal Investigation, and Resources Management activities. Similar positions are being considered for other occupational areas.

Jobs for the Handicapped

The number of handicapped employees in IRS increased from 1,667 in 1977 to 1,701 in 1978. The IRS nominee for Outstanding Federal Handicapped Employee of the Year

was William J. Boucher, a tax auditor from the Austin District. Mr. Boucher also was selected as the Treasury Department's nominee for Outstanding Federal Handicapped Employee of the Year.

Awards for Incentive

The IRS Incentive Awards Program received special attention in 1978 with many employees receiving recognition for their outstanding contributions to IRS — including two Meritorious Service Awards, fifteen Commissioner's Awards, five Special Achievement Awards of \$1,000 or more and two special recognition awards for exposing bribery schemes.

Also, several employees received recognition from organizations outside of IRS. Deputy Commissioner William E. Williams was the Department of the Treasury nominee for the 1977 Roger W. Jones Award for Executive Leadership. Sixty-five employees received Presidential Letters of Recognition for employee contributions that resulted in tangible benefits of \$5,000 or more.

Linda Molyneux of the Fresno Service Center was presented the 1977 John E. Fogarty Public Personnel Award for her outstanding efforts toward the hiring of the handicapped. This award, the highest given by the President's Committee on Employment of the Handicapped, was made on June 13, 1978, at the International Association of Personnel Employment Security Convention in St. Louis.

Yolanda Carrillo of the Fresno Service Center has had an exceptional year — beginning with an award of \$1,285 for a suggestion with a tangible benefit of \$184,000. In addition to the cash award, Ms. Carrillo's accomplishment brought a Presidential Letter of Recognition and made her one of eleven recipients of the 1977 Presidential Management Improvement Award. This award was presented in the White House Rose Garden on May 23, 1978, by the President.

Internal Revenue Manual

The Service adopted a new system to compose, print and distribute its internal operating procedures in the *Internal Revenue Manual*. Using electronic technology, accurate copy is produced in 6" x 9" format at less cost and in less time than with the old method. Additional services, provided under a single contract, include filling orders for current parts or handbooks, comprehensive topical indexes and management summaries of recent functional or operational changes to any part of the *Manual*.

Training

Consistent with President Carter's commitment to improve the quality of public correspondence, nearly 700 IRS employees attended various workshops that stressed clarity and responsiveness in writing.

Four different writing workshops are offered to accommodate employee needs. The training ranges from 8 to 40 hours of classroom work, plus some self-study exercises. It is designed for the executive, the legal or technical originator, the reviewer, and those persons needing refresher courses.

The Coordinated Examination Training Program was developed and piloted in early 1978. This course will provide a cadre of revenue agent specialists who can determine areas of accounting systems to be isolated for more thorough auditing and reducing or eliminating the time expended on nonproductive auditing.

This training also will provide a greater degree of uniformity and consistency in resolving tax issues, simplify decisions on taxability and eliminate duplication of effort. Some 325 senior agents are expected to be trained for the program in each future year.

The IRS continued to conduct basic training for the Criminal Investigation Division at the Federal Law Enforcement Training Center at Glynco, Ga.

Several new programs were produced to support the Criminal Investigation Division — new on-the-job training for recruit special agents was tested, all special agents received review training in the implication of the new disclosure provision of the law and a TV tape test, similar to the national drivers' exam, was used. A wagering tax course also was written and piloted this year.

A three-day program to train examination employees — revenue agents, tax auditors, and estate tax attorneys — for detailed identification and examination of abusive tax shelters was developed this year to take "a vigorous position on marginal tax shelters and loopholes of one kind or another."

The training provides examiners with the general tools needed to recognize the abusive elements of a tax shelter regardless of its business nature or reporting form.

Tax shelter training is now an integral part of all new examiners' training courses. This training also is given to incumbent employees as part of the update courses and a limited partnership portion serves to reinforce previous tax shelter training.

The IRS trained approximately 4,000 data transcribers using a 60-hour training program. In previous years the direct-data entry training program was 80 hours.

By using this new, shorter training program the IRS saved approximately \$404,000 in training, administrative and instructor costs. The reduced amount of training had no adverse effect on the trainees' ability to reach the job standards for speed and accuracy.

Instructing Others

More than 100 employees of state and local governments participated in IRS training activities.

Financial investigative courses were held for the Maricopa County, Ariz., sheriff's association to train 20 participants from various local police and attorney general offices and for 48 members of the Pennsylvania Crime Commission.

Students in the five-week IRS special agent course included revenue employees from the Colorado Department of Revenue, the New Jersey Department of Law and Safety, and the Philippines, Dallas, Tex., and Phoenix, Ariz., governments.

Participants in various revenue agent training courses included employees of the government of American Samoa; the

states of Alaska, New York, Maine, and Oregon; and the cities of Milwaukee, Wis. and St. Paul, Minn. Special investigation employees of the St. Louis, Mo., Police Department attended our 8-day wagering tax course. Instructor training and course assistance was provided to the Idaho State Tax Commission to enable it to train employees in auditing techniques.

Career Counseling

Career Counseling Center opened at the IRS National Office to enhance IRS Equal Employment Opportunity efforts by helping supervisors and employees in setting realistic goals and devising courses of action in career growth planning.

The center provides a wide range of services, including formal consultations and diagnostic testing, skills assessment and other guidance given by a team of counseling specialists.

Logistics Support

IRS continued its efforts to eliminate unnecessary internal reporting, canceling 21 reports in 1978 for annual savings of approximately \$406,000.

The IRS conducted an extensive study of the taxpayer assistance Toll-Free Telephone System (TFTS) to determine if the efficiency of that operation could be improved. The study identified the best locations and the optimum number of sites to locate the TFTS answering operations. New procedures were developed for the telephone circuitry used in the toll-free system to provide a better balance between incoming circuits and answering positions. The initial result of these efforts was a \$2 million reduction in the telecommunications cost for the toll-free program.

Communications costs were also reduced by new procedures for transmission of written records, such as facsimile, teletype, and express mail, and more control over commercial long distance and

Federal Telecommunications System usage. These efforts saved approximately \$1.6 million.

An internal management reporting system has helped the IRS to control its space inventory and costs. Approximately \$500,000 was saved by releasing space, using space savings techniques and closely reviewing utility and service charges. Multiple-occupancy work stations and open office planning concepts are also resulting in space savings.

During 1978 the IRS reduced its regional and district use of office space 4 sq. ft. per person saving 221,000 sq. ft. or approximately \$1.7 million.

The IRS continued to rate as one of the top federal agencies in occupational safety and health. In Calendar Year 1977, the IRS reduced both disabling injuries and motor vehicle accidents at a time when most agencies realized substantial increases in rates. The IRS had a rate of 3.4 disabling employee injuries per million staff hours worked. Service employees drove 119 million miles on official business with 671 accidents, 72 less than in Calendar Year 1976. The accident frequency rate decreased from 5.8 to 5.6 accidents per million miles driven.

By using unique service center ZIP codes for the 1978 filing season, the IRS reduced the average transit time of mail from the taxpayer to the service centers by one day. Because Treasury has use of the tax revenue one day earlier, the government saves some \$5 million in interest annually.

And, records disposal resulted in the release of space and equipment valued at \$3,809,000. A total of 208,273 cubic feet of records was destroyed and 592,570 cubic feet of records were retired to Federal Records Centers.

Data Services

The Office of Assistant Commissioner (Data Services) is responsible for developing, implementing and evaluating computer systems, programs and hardware requirements. Originally consisting of

the Service and Design Division, the Systems Programming Division and the Systems Analysis Division and two computer facilities — the National Computer Center and the Data Center — it now also includes the Systems Development office and the Planning and Control staff.

Handling Payments

IRS is installing a new remittance processing system (RPS) for quicker and more efficient handling of tax payments. RPS processes the remittance, encodes the source document with an audit trail and prepares documentation for forwarding to the bank with the checks. It also forwards transactions to the appropriate master file to indicate receipt of the remittances before the source documents are processed, aiding in answering taxpayer inquiries.

Case Reporting

A nationwide system was established to meet inventory management and case control needs of Criminal Investigation Division field managers and to provide senior management with important statistical data and reports.

The file itself contains complete information on all Criminal Investigation Division cases and projects. Each service center has its own data base that can be "called up" by the districts serviced by it. Research capabilities also are provided and a series of reports are generated in the service centers every week.

Automated Information

Control of partnership returns on the Audit Information Management System (AIMS) was implemented on a test basis in Salt Lake City District Office and Ogden Service Center on July 1, 1978.

Under the system the examiner of the partnership return is able to requisition an unlimited number of partner returns for shipment and examination in the partner's district office. The examiner of the partnership return receives a monthly report showing all partners established on the data base. Each district office receives a cumulated monthly report showing income adjustments applied to a partner's return in the district, resulting from partnership examination.

National Computer Center

Computerized master file operations of the integrated tax administration system is performed at the National Computer Center in Martinsburg, W. Va. Eight large computers and three computerized microfilm systems are used for the individual, business, exempt organization, employee plans and individual retirement account master files for the nation.

The Computer Center operates 24 hours a day, seven days a week and maintains reciprocal accounting with each of the ten service centers. Input of data to the Computer Center — such as tax returns, tax payments, and adjustments — is primarily on magnetic tape shipped from the service

centers and other organizations by air. The output, also on magnetic tape, contains data for printing notices — such as bills, refund checks, etc. — and is air shipped to the service centers and other federal and state agencies. During the year the Computer Center received more than 84,000 input tapes and shipped more than 82,000 output tapes.

As of August 1978 there were 121,063 magnetic tapes in the Computer Center library, with the Individual Master File containing 111,028,298 taxpayer accounts; the Business Master File, 17,106,712 accounts; the Exempt Organization Master File, 1,007,496 accounts; the Employee Plans Master File, 1,129,694 accounts and the Individual Retirement Account Master File, 2,876,309 accounts.

Data Center

The Data Center in Detroit, Mich., is responsible for non-master file data processing operations for the IRS.

In 1978 a new system was selected to replace the current computer systems. Installation of the replacement system is scheduled to take place in early Calendar Year 1979 with testing and acceptance expected by the middle of the year.

Two new software systems were installed to monitor and report computer use and to control development of new systems and produce reports of personnel utilization.

The Data Center is processing up to one million employee benefit plan forms for the Department of Labor this filing season, with work started in late 1978. Processing involves the filming of returns with special cameras and producing output on microfiche equipment for shipment to service centers, the National Archives and the Department of Labor.

Technical Activities

The IRS tax ruling program consists of letter rulings, technical advice and published revenue rulings. During the year the IRS acted on 25,357 requests for tax rulings and technical advice, and issued 538 revenue rulings and revenue procedures.

A letter ruling is a written statement issued to a taxpayer by the National Office interpreting and applying tax law to a specific set of facts. Such a ruling provides guidance concerning the tax effects of a proposed transaction. Letter rulings are not precedents and may not be relied upon by taxpayers other than the recipient.

Technical advice provides guidance on the proper application of the tax laws to specific facts issued by the National Office at the request of a district office in connection with the audit of a taxpayer's return or claim for refund or credit. Frequently, the District Director's request is made at the suggestion of a taxpayer that technical advice be sought.

A revenue ruling is an interpretation of the tax laws issued by the National Office and

published in the *Internal Revenue Bulletin* to inform and guide taxpayers, practitioners and IRS personnel.

Tax Shelter Rulings

During 1978, the Service continued an active program of publishing revenue rulings to answer significant issues with respect to tax shelters and other artificial tax devices. The goals of this program are to provide technical guidance to taxpayers and to IRS personnel on the specific issues presented and to increase public awareness that the IRS will carefully scrutinize tax-motivated transactions. A highlight of this program was the publication on Oct. 31, 1977, of nine revenue rulings addressing a number of current tax shelter issues.

Art Advisory Panel

The Art Advisory Panel held three meetings at the National Office during its tenth anniversary. Since 1968 this unpaid, twelve-member panel of art experts — museum directors, curators, scholars and

dealers — has helped IRS to review taxpayers' appraisals and to determine the value of works of art donated to charity for gift or estate tax purposes.

All appraisals of works of art claimed at \$20,000 or more in audited tax returns must be referred to the National Office for review. The claimed value of the average item referred to the panel recently has been close to \$100,000. Nearly half of all reviewed appraisals are found to be unacceptable.

The panel reviewed appraisals on 702 works of art with taxpayer claimed values amounting to \$67 million this year, resulting in valuation adjustments of \$12 million. During its ten years of operation, the panel has reviewed appraisals with claimed values of \$276 million, which resulted in valuation adjustments of \$75 million.

Internal Revenue Bulletin

The weekly *Internal Revenue Bulletin* announces official rulings and procedures of IRS and publishes Treasury Decisions, Executive Orders, tax conventions, legislation, court decisions and other items of general interest. *Bulletin* contents of a permanent nature are consolidated semi-annually into *Cumulative Bulletins*, with weekly and semiannual issues distributed within IRS and available to the public through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

During 1978 the *Bulletin* included 499 revenue rulings, 39 revenue procedures, 8 Public Laws relating to Internal Revenue matters and 10 committee reports, 58 Treasury Decisions containing new or amended regulations, 50 delegation orders, 4 Treasury Department Orders, 14 notices of suspension and disbarment from practice before the IRS, 268 announcements of general interest and 8 court decisions.

The Bulletin Index-Digest System, with current supplements, aids in researching material published in the *Bulletin* after

Revenue Rulings and Revenue Procedures Published in 1978

Type	Number

Employment taxes	24
Estate and Gift Taxes	46
Excise Taxes	58
Exempt Organizations	55
Income Taxes	322
Employee Plans	16
Tax Conventions	1
Total	538

1952. The accompanying table shows a breakout of the types of revenue rulings and revenue procedures published in 1978.

Making Rulings Public

The Tax Reform Act of 1976 provided that IRS rulings and technical advice generally be opened to public inspection after the deletion of the taxpayer's identity, trade secrets and confidential commercial and financial information.

Rulings and technical advice requested after Oct. 31, 1976, generally are made available within 90 days after they are issued to taxpayers. Of the approximately 80,000 issued in answer to requests made before Nov. 1, 1976, 25,000 were made available to the public in 1978. The remaining rulings will be opened for public inspection in 1979.

Publishing Services developed a computer-based system to produce microfiche indexes for the release of letter rulings and Code section indexes for the weekly release of current rulings. Nine monthly and cumulative indexes were developed to provide the ruling information in various formats based on user needs.

Requests for Tax Rulings and Technical Advice (Closings) 1978

Subject	Total	Taxpayers' Requests	Field Requests

Corporation Tax Matters	4,063	3,792	271

Inspection The Inspection Service's internal audit and security programs aid IRS managers in maintaining the highest levels of efficiency and integrity.

Internal Audit

The Internal Audit Division independently appraises the operations of the IRS to measure the extent of compliance with established management policies and to determine whether procedures are in accordance with law and regulations. Controls are reviewed in all IRS activities to ensure that both taxpayers' and the government's rights are protected and that operations are carried out efficiently, effectively and with integrity.

Internal Audit reviews operations that have widespread impact on the IRS or that are considered high risk. The review of controls for safeguarding tax information and assuring fair and equitable treatment of taxpayers also is stressed.

To improve the efficiency of IRS operations, national coordinated audits are being used more often to provide uniform coverage in several offices and to evaluate the operation of a program better on a nationwide basis. These audits provide managers with a better perspective of their operations, permit nationwide corrective action if necessary and require less staff.

Abstracts of Internal Audit findings are prepared and distributed to Service officials nationwide to help identify operational areas that may need increased management attention.

Internal Audit issued 241 reports to IRS managers during the fiscal year. Management actions on these problems resulted in better service to taxpayers, strengthened controls and improved operations. In addition, response to Internal Audit findings resulted in measurable savings and additional revenue estimated to total \$157 million.

Maintaining Integrity

Internal Audit gives priority to the detection of fraud, embezzlement or other wrongdoing on the part of IRS employees. During the year Internal Audit informed the Internal Security Division of possible breaches of integrity by 161 employees and 38 other individuals. Of the investigations begun into these possible breaches 97 investigations were completed in 1978. As a result, 84 employees and 8 others were cleared of allegations of improprieties, while actions were taken or were pending against 1 employee and 4 others.

Internal Security

The Internal Security Division protects the integrity of the IRS by investigating high risk areas and alerting managers and employees to integrity hazards.

The Division investigates complaints of criminal misconduct or irregularities affecting IRS employees or operations. It also conducts investigations of non-IRS persons who attempt to bribe, threaten or assault IRS personnel, the unauthorized disclosure of federal tax return information, disclosure or use of information by preparers of returns and charges against tax practitioners.

The Division also investigates IRS job applicants and conducts special investigations and inquiries for the Commissioner and the Secretary of the Treasury.

During 1978 Internal Security inspectors arrested or were responsible for the indictment of 147 persons including 92 taxpayers and tax practitioners, and 55 employees or former employees. During the year, 95 persons were convicted, including 83 defendants who pleaded guilty. Of these, 46 convictions were for bribery, 11 were for assault and the remainder involved such criminal charges as conspiracy to defraud the government, obstruction of justice, subscribing to false returns, disclosure of confidential tax information and embezzlement.

In one case, two high officials of a nationally known company were convicted of authorizing gratuities of approximately \$27,000 to IRS employees. The corporation also was convicted and fined \$36,000. Earlier an IRS audit manager was convicted of accepting free vacation trips from the company.

Bribery Awareness

The Division increased the number of bribery awareness presentations to IRS employees, expanding them to include videotapes that realistically portray bribery situations IRS employees may encounter.

The effectiveness of these presentations may be gauged by the facts — 186 employees reported 252 possible bribery attempts resulting in 73 arrests or indictments and at the end of 1978, 21 persons were awaiting trial on bribery charges.

Assaults and Threats

FBI statistics from last year show that 74 percent of all threats and 41 percent of all assaults on federal employees were directed at IRS employees.

Internal Security responds promptly to protect IRS employees threatened or assaulted while performing their duties and seeks vigorous prosecution of these cases by the U.S. Attorney. In instances where prosecution is declined — usually in verbal threat cases without physical assault — an inspector, with the approval

of the U.S. Attorney, contacts the alleged assailant to inform him or her of applicable federal statutes concerning assaults or threats on government employees. The person also is advised that repetitive acts could result in prosecution.

The Division is conducting studies seeking better ways to ensure the safety of IRS employees in assault and threat situations.

Checking the Workforce

The Internal Security Division completed 13,017 investigations of employees during the year and 15,674 police record checks on persons considered for temporary appointments.

These investigations and record searches resulted in the rejection of 85 job applicants and disciplinary actions, including separations, suspensions, reprimands, warnings or demotions against 741 employees. Also, at the request of the Office of the Secretary of the Treasury, the Division conducted special investigations involving employees of other Treasury bureaus.

While some investigations of IRS employees resulted in criminal prosecution or disciplinary action, in many other cases employees were exonerated of accusations of misconduct.

Taking Precautions

In each region, 100 integrity development projects initiated by Internal Audit and Internal Security probed high risk IRS operations. As an alternative to merely reacting to complaints, allegations or referrals this approach is designed to identify and examine areas in Service operations particularly susceptible to corruption and fraud.

Chief Counsel

The Chief Counsel, an Assistant General Counsel of the Treasury Department, is the chief legal officer for the Internal Revenue Service and is a member of the Commissioner's executive staff. As such the Chief Counsel advises the Commissioner on matters pertaining to the administration and enforcement of the internal revenue laws and related statutes, as well as on nontax legal questions.

The Chief Counsel is assisted by a Deputy Chief Counsel (General), a Deputy Chief Counsel (Litigation), a Deputy Chief Counsel (Technical) and seven Regional Counsels.

The Office of Chief Counsel employs over 900 attorneys, making it — next to the Department of Justice — the largest law firm in the country. These attorneys are located in the National Office, the seven Regional Counsel offices and 45 District Counsel offices.

Approximately 35 percent of attorney time is spent handling litigation in the United States Tax Court. The attorneys also advise the Service and assist the Department of Justice on refund suits, criminal tax cases, suits seeking the disclosure of files and documents of the IRS, collection suits, and nontax litigation involving the Service in federal and state courts.

The Chief Counsel made some organizational changes effective July 2, 1978. These changes will enable the Chief Counsel organization to provide more efficient legal and technical assistance to all functions and levels of the Internal Revenue Service and to be more responsive to the needs of taxpayers and their representatives.

Refund litigation work was decentralized to the field offices and the coordination, review and policy functions of the Refund Litigation Division were combined with the Tax Court Litigation Division and redesignated the Tax Litigation Division.

The Regional Counsel structure was modified. District offices were created at the site of each of the seven regional headquarters offices and Regional

Counsel offices were established for each region, along with eight new district offices.

Attorneys in the district offices will work in all field activities, to the extent feasible, so that they can gain experience and be utilized in all phases.

An Employee Plans and Exempt Organizations Division was established under the Deputy Chief Counsel (Technical).

The National Office divisions supervised by the Deputies Chief Counsel have been realigned and are set forth in the organization table.

The purpose of the organizational realignment is to decentralize case responsibility to field offices, to strengthen the field organization and to augment the ability to provide legal advice and service to IRS regions and districts. The National Office continues to serve in policy formulation, providing technical guidance, interpretation, coordination and assuring uniformity of positions.

Administrative Services

The Administrative Services Division is responsible for budget, administration, and management in the Office of Chief Counsel. The Division coordinates the recruitment program for the Chief Counsel's office, runs the Summer Employment Program for legal interns and provides opportunities for Counsel attorneys to participate in law school, bar association and in-house training courses.

Under the aegis of the Division, an Equal Employment Opportunity Advisory Committee and a Federal Women's Program Advisory Committee, assist with the Chief Counsel's Equal Employment Opportunity Program. The office exceeded its affirmative action goals in 1978.

The Division is engaged in planning and analysis, cost/benefit studies, systems development and operational activities such as legal information retrieval and computer equipment analysis. During 1978, it initiated major changes in the Chief Counsel Reports and Information Retrieval Activity (RIRA) System. With support of the Assistant Commissioner

(Planning and Research), the Division also planned, developed and monitored an automated attorney work/time sampling for use in zero based budgeting, long range planning and management control.

Planning is underway to decentralize the RIRA System for refund suits and to redesign most reports. It also is participating in the development of a master plan for the proposed Servicewide Management Information System and is conducting a feasibility study of a proposed Chief Counsel integrated management information system to provide automated services for inventory control, workload planning, preparation of reports and legal research.

The Division recruited paralegal specialists for all divisions of the National Office to assist attorneys in legal and other work. Plans are underway to recruit paralegals for the larger field offices.

Criminal Tax

Attorneys in the Criminal Tax Division handle criminal tax legal matters for the IRS, furnish legal advice to the Criminal Investigation Division and review cases to

determine if prosecution is warranted. The function also coordinates criminal prosecutions with the Department of Justice, provides assistance to U.S. Attorneys in criminal tax trials upon request, assists the Tax Litigation Division in the application of the civil fraud penalties and coordinates disclosure, Freedom of Information Act, and Privacy Act matters in cases where criminal action is anticipated or has been undertaken.

The most pressing criminal tax issue this past year concerned alleged grand jury abuses. In *In Re: April 1977 Grand Jury Proceedings (General Motors Corporation)*, 573 F.2d 936 (6th Cir. 1978), rehearing en banc June 13, 1978, reversed on jurisdictional grounds Sept. 7, 1978, the original court of appeals panel ordered the termination of a grand jury investigation because of the participation of a Regional Counsel attorney specially designated by the Attorney General. The panel viewed such participation as creating the appearance of a conflict of interest in light of the attorney's status and earlier handling of related matters for the IRS. The full court, in a split decision, reversed on procedural grounds.

While the *General Motors* en banc proceeding in the Sixth Circuit was pending, in another case the Fourth Circuit found no basis to invoke *mandamus* to protect against alleged grand jury abuses. In *In Re: Grand Jury Subpoenas, April 1978, at*

Baltimore, 47 LW 2138, Nos. 78-1335/36 (4th Cir. August 3, 1978), the corporate target complained that certain grand jury subpoenas were overly broad and improperly motivated. The court of appeals found adequate protection in the grand jury secrecy provisions.

In June 1978 the IRS and Counsel issued new rules governing the relationship of the IRS and the grand jury and establishing strict criteria for involvement of IRS personnel in grand jury proceedings. Authority to refer potential criminal tax matters for grand jury investigation is vested in a handful of high level officials. Generally, a request for a grand jury investigation must be personally reviewed and approved by the Regional Commissioner and Regional Counsel. Receipt and use of grand jury materials are tightly restricted. Service personnel assisting grand juries are completely insulated from related activities involving civil tax liabilities.

Disclosure Litigation

Attorneys in the Disclosure Litigation Division handle the Freedom of Information Act, as well as requests for disclosure of documents and testimony in both tax and

nontax litigation. The Division also is responsible for providing legal advice to the IRS on the Privacy Act of 1974.

Disclosure works closely with the Disclosure Operations Division of the IRS, also coordinating with the Department of Justice all litigation arising under the Freedom of Information and Privacy Acts, including recommendations about defense or settlement of suits and appeals of adverse decisions.

Much of the 1978 litigation concerned taxpayer attempts to gain access to civil and criminal investigatory files through the Freedom of Information and Privacy Acts rather than using established discovery procedures. Also, employees and their union representatives increasingly have litigated under these acts to attempt to obtain access to personnel records of other employees and management documents for use in grievance and other personnel proceedings.

EP/EO

The Employee Plans and Exempt Organizations Division provides legal assistance to the Office of the Assistant Commissioner (EP/EO) in the issuance of letter rulings

and determinations to taxpayers, technical advice to IRS personnel and revenue rulings and revenue procedures. The EP/EO Division also provides legal assistance to other divisions in Chief Counsel in determining litigating positions and in coordinating the litigating positions with the ruling positions of the IRS on employee plans and exempt organizations matters. The Division, in EP/EO matters, represents the Commissioner and IRS in tax legislative matters; provides the Treasury Department with technical assistance and expertise in the development and drafting of internal revenue legislation; furnishes assistance to congressional staffs in the drafting of committee reports; drafts and conducts hearings on proposed regulations, and assists in the preparation and review of certain tax forms, instructions, and publications.

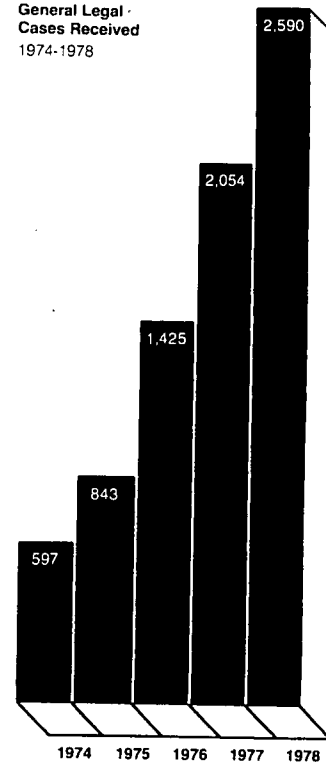

The EP/EO Division was established in July, 1978, at which time approximately 48 regulations projects were received from the Legislation and Regulations Division and some 40 cases were received from the Interpretative Division.

General Legal Services

The General Legal Services Division handles nontax legal matters. Attorneys in the General Legal Services function in the National Office and field offices represent the IRS in labor cases, including representation hearings, impasse proceedings,

unfair labor practices and arbitration hearings and serve as a member of and counsel to management teams negotiating individual and multi-unit labor agreements. The Division also provides representation, where proper, to IRS employees and officials who are sued for damages in actions taken in the due performance of

Pending September 30, 1978	10,097	1,754	11,851

official duties. These attorneys also represent the IRS in adverse action and discrimination proceedings, and the Director of Practice, Office of the Secretary of the Treasury, in disciplinary actions brought against tax practitioners, as well as provide advice to the IRS concerning government contracts, tort claims, forfeitures, problems involving ethics, Inspection Service actions and other matters not directly involving federal taxes. For 1978, the attorneys tried 173 cases with 1,494 hours of trial time.

During this past year the number of suits filed by so-called tax protestors substantially increased. Also, there was a sizable increase in class action discrimination complaints. The reasons for the increase in these complaints and what must be done to eliminate unjustified complaints are being examined.

General Litigation

The General Litigation Division furnishes legal advice to the IRS in connection with the assessment and collection of federal taxes and assists the Department of Justice in the prosecution and defense of suits to collect taxes, suits to recover erroneous refunds, proceedings under the Bankruptcy Act and other insolvencies, civil enforcement of summonses and injunction and declaratory judgment actions. It furnishes legal services, and assistance unrelated to docketed cases, including day-to-day formal and informal advice to IRS and local district offices, and to the Assistant Commissioners of Compliance, and Taxpayer Service and Returns Processing.

A significant development in summons enforcement is the Supreme Court's clarification of the "sole criminal purpose" criterion employed by courts in determining whether a summons should be enforced. In *United States v. LaSalle National Bank*, 98 S. Ct. 2357 (1978), it was held that the IRS may not obtain enforcement of a summons issued solely for a criminal investigatory purpose. Nevertheless enforcement of a summons issued by a special agent may not be denied merely because the special agent focused solely upon the criminal liability of the taxpayer. Rather, the determination of whether an investigation has a solely criminal purpose must be answered only by an examination of institutional posture of the IRS. The special agent's motive or purpose, however, is not equatable with the IRS's motive or purpose.

Interpretative

The Interpretative Division provides legal assistance to the Assistant Commissioner (Technical) in the issuance of letter rulings to taxpayers, technical advice to IRS personnel, and revenue rulings and revenue procedures to guide the general public. Interpretative also provides legal assistance to other divisions in the Chief Counsel's office in establishing litigating positions, and in coordinating litigating positions with the ruling positions of the IRS except in cases involving employee plans, exempt organizations and certain general litigation matters.

During 1978 Interpretative Division attorneys assisted in the preparation of a substantial number of revenue rulings. Among the more significant were several rulings dealing with tax shelter abuses.

The Division participated in the resolution of several long-standing and difficult depreciation matters and other matters concerning pre-bankruptcy income tax claims against The Pennsylvania Railroad. This settlement was noted in the Opinion and Orders Regarding Confirmation and Consummation of Plan of Reorganization of the United States District Court, dated Aug. 17, 1978.

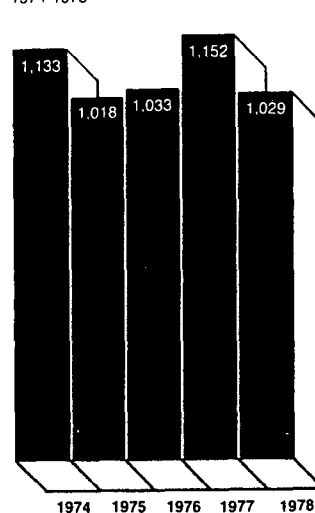

Legislation and Regulations

The Legislation and Regulations Division represents the Commissioner and drafts proposed regulations, other than those relating to employee plans and exempt organizations. Division attorneys provide the Treasury with technical expertise in developing and drafting internal revenue legislation. They also help congressional staffs draft committee reports on tax legislation.

Legislation and Regulations Division attorneys represent the IRS in negotiating and drafting tax treaties with foreign governments. Working closely with IRS officials, attorneys in this Division also participate in the preparation and review of tax forms and instructions, hold hearings on proposed regulations, evaluate suggestions by IRS personnel for regulatory changes and review taxpayer publications issued by the IRS.

During 1978 the Division continued to develop regulations to implement the Tax Reform Act of 1976. Included were

Refund Litigation Cases Received 1974-1978

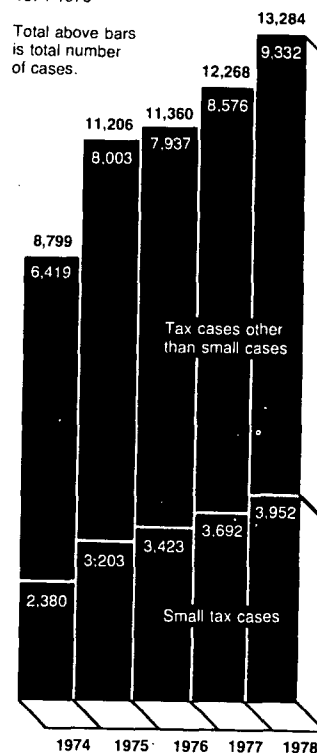

regulations relating to disclosures of tax returns and return information for tax administration purposes, duties of income tax return preparers, refunding of industrial development bonds, public inspection of written determinations of the IRS, group term life insurance, tax credit for earned income, New Jobs Tax Credit, real estate investment trusts and property transferred in connection with performance of services.

Tax Litigation

As part of the Chief Counsel reorganization the Refund Litigation Division was combined with the Tax Court Litigation Division and responsibilities for tax refund matters were decentralized to the Regional and District Counsels. The new Tax Litigation Division is responsible for the coordination, review and policy functions of both old divisions.

One of the major responsibilities of the Office of Chief Counsel is the representation of the Commissioner in all actions brought in the United States Tax Court. Trial of Tax Court cases is generally the responsibility of attorneys in the field offices. The field offices serve as the legal advisor to the Appeals Division, District Directors, Service Center Directors, and the Director of the Office of International Operations, and review certain categories of statutory notices of deficiency in non-docketed cases. The Tax Litigation Division in the National Office participates in the formulation of positions to be adopted in cases before the Tax Court to assure uniformity and consistency in Tax Court litigation.

There is a Small Tax Case procedure in the Tax Court for cases involving deficiencies of \$1,500 or less. Such cases are heard by Tax Court Special Trial Judges, and neither the taxpayer nor the government may appeal from decisions in such cases.

Tax in Litigation—Tax Court Cases (In Thousands of Dollars)

Status	All Tax Court Cases ²						Small Tax Cases					
	Taxes and Penalties			Overpayments			Taxes and Penalties			Overpayments		
	Number of Cases ¹	In Dispute	Determined	Claimed	Determined	Amount	Number of Cases	In Dispute	Determined	Claimed	Determined	Amount

Recovery Rate ⁴			33.7%									
Pending 9/30/78	23,167	3,262,216		278,537			3,503	2,551		23		

¹ Does not include an inventory of non-delinquency (Employee Plans and Exempt Organizations) cases consisting of 35 cases pending 10/1/77, 35 receipts, 24 disposals, and 46 cases pending 9/30/78.
² Includes both small tax cases and other.
³ Disposals include cases tried, settled, and dismissed. Some of the determined amounts are for cases which were subsequently appealed.

⁴ Amount determined expressed as percentage of Amount Assessed or Claimed. These amounts do not include proposed assessments which are agreed to by the taxpayer at District or Appellate conferences. In the case of a claimed overpayment, the Recovery Rates shown above represent the portion of the amount in dispute which was refunded to the taxpayer.
⁵ Revised figure.

The Service modified its settlement procedures in an effort to settle more Tax Court cases and better prepare the cases that go to trial. This revised procedure sets new procedures dividing settlement jurisdiction over cases between the Appeals Division and the Chief Counsel's Office. Generally, Chief Counsel will have exclusive jurisdiction over the disposition of cases in which the statutory notice has been issued by the Appeals Division. In most other cases the Appeals Division will have exclusive settlement jurisdiction for four months after all pleadings have been filed in the Tax Court. If a case is not settled by the Appeals Division within four months it generally will be returned to Counsel for preparation for trial. After trial preparation Counsel may consider settlement negotiations.

The Tax Litigation Division also now performs all necessary legal services on behalf of the IRS in connection with suits instituted by taxpayers in the United States District Courts and the Court of Claims for refund of taxes. The Division determines and coordinates the legal position of the IRS in these suits and incorporates such positions in recommendations to the Department of Justice, which handles the actual trial of such cases. The Division also advises the Department of Justice on suits for declaratory judgments regarding tax exempt status brought in the District Court for the District of Columbia and the Court of Claims. The field offices serve as the legal advisor to the Appellate Division, District Directors, Service Center Directors, and the Director of the Office of International Operations, and review certain categories of statutory notices of refund claim disallowances.

Appellate Court Case Record (Decisions—Refund Litigation and Tax Court Cases)

Court	Total	For the Government		Against the Government		Partly for and Partly Against the Government	
		No.	%	No.	%	No.	%

Footnotes for Tables 1-4

* Less than \$500.
 * Revised.

1. The receipts in the various States do not indicate the federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States.

2. Includes taxes on unrelated business income of exempt organizations.

3. Collections of individual income tax not withheld include old-age survivors, disability, and hospital insurance taxes on self-employment income (SECA). Similarly, the collections of individual income tax withheld are reported in combined amounts with old-age, survivors, disability, and hospital insurance taxes (FICA) on salaries and wages. Estimated separate national totals for individual income tax and for old-age, survivors, disability, and hospital insurance taxes are shown in the text table on Gross Internal Revenue Collections, page 9, and are used in obtaining national totals for individual income taxes and employment taxes in Table 4.

4. Self-employment tax and taxes imposed by the Federal Insurance Contributions Act are applicable with respect to Guam and American Samoa. Amounts of such taxes collected in Guam and American Samoa are combined with similar taxes reported for Office of International Operations—Other.

5. Includes Fiduciary income tax collections of \$1.3 billion.

6. Beginning with fiscal year 1957, the United States total is adjusted to exclude withheld individual income taxes transferred to the Government of Guam in accordance with the provisions of Public Law 630, approved Aug. 1, 1950 (64 Stat. 392). This adjustment amounted to \$15.2 million for 1978.

7. Includes net adjustment of \$216,292,000 made by the Department of the Treasury.

8. This district is designated to report all revenue collections received from taxpayers residing outside of the area serviced by its Internal Revenue Service Center.

9. Tax payments made to banks, under the Federal tax deposit system are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the Federal tax deposit payment is applied to the taxpayer's liability from tax returns filed.

10. Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess payments under the Federal Insurance Contribution Act (FICA).

11. Designations by taxpayers of a portion of their taxes to the Presidential Election Campaign Fund are not collections, as such, because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and, therefore, have no effect on district and regional collection data.

12. Represents amounts offset against outstanding tax liabilities other than those for Forms 1040 and 1040A on which the credits are claimed.

13. Amounts of internal revenue taxes collected on Puerto Rican products transported to the United States or consumed on the island (less refunds, drawbacks, and expenses) are covered into the Treasury of Puerto Rico under provisions of secs. 7652(a)(3) and 5314(a)(4) of the Internal Revenue Code of 1954. The gross amounts are included in overall collection results (Tables 1 through 4).

14. Refer to Table 3 for components.

15. Corporation income tax rates: Effective January 1, 1965, first \$25,000 of net income normal tax of 22 percent, net income in excess of \$25,000 combined normal and surtax of 48 percent. Normal tax and surtax also apply to net income derived by certain exempt organizations from unrelated trade or business. Effective January 1, 1968, a 10 percent per annum surcharge was added to the tax (Public Law 90-364). The 10 percent per annum surcharge was extended to December 31, 1969, by Public Law 91-53, extended to June 30, 1970, by Public Law 91-172 at a 5 percent annual rate, and then discontinued. Under the Tax Reduction Act of 1975 (P.L. 94-12), effective for 1975 returns, surtax exemption increased to \$50,000 and normal tax reduced to 20 percent on first \$25,000 of taxable income. These changes were extended by The Revenue Adjustment Act of 1975 (P.L. 94-164) to June 30, 1976, for 1976 returns at rates designed to achieve the half year extension. The lower rates and higher surtax exemption were extended through 1977 by the Tax Reform Act of 1976 (P.L. 94-455) and through 1978 by the Tax Reduction and Simplification Act of 1977 (P.L. 95-30).

16. Individual income tax rates: Effective January 1, 1965, graduated rates from 14 percent to 70 percent of taxable income. A 10 percent per annum surcharge added by Public Law 90-364, effective April 1, 1968, for individuals, was extended to December 31, 1969, at the same annual rate (Public Law 91-53), extended to June 30, 1970 (Public Law 91-172) at a 5 percent annual rate, and then discontinued. Includes SECA taxes of 7.5 percent on net earnings up to \$15,500 for 1977 and of 8.1 percent on earnings up to \$17,700 for 1978.

17. Rates of tax are as follows: Income Tax graduated withholding on wages in excess of exemptions: Public Law 89-368, effective July 1, 1967, 14 to 33 percent; Public Law 91-172, effective January 1, 1970, 14 to 25 percent; 14 to 35 percent effective January 16, 1972, under Public Law 92-178; 16 to 36 percent effective April 30, 1975, under Public Law 94-12 and 94-244; 16 to 36 percent effective January 1, 1977, under Public Law 95-30. A combined FICA tax rate of 11.7 percent was in effect on salaries and wages up to \$16,500 for calendar year 1977 and 12.1 percent on wages up to \$17,700 for 1978.

18. Consists of regular railroad retirement combined tax rate of 21.2 percent for calendar year 1977 and 21.6 percent for 1978. Tax applies to employers (15.35% for 1977 and 15.55 percent for 1978) employees (5.85% for 1977 and 6.05% for 1978) and is imposed on taxable portion of wages (limited to first 1,375 of monthly taxable compensation for 1977 and \$1,475 for 1978). Further includes railroad employee representatives tax of 21.2 percent for calendar year 1977 and 21.5 percent for 1978 on taxable portion of compensation received. In addition, a supplemental tax levied quarterly by the Railroad Retirement Board is imposed on employers and employee representatives based on man-hours worked.

19. Employers of one or more persons in each of 20 calendar weeks or who paid wages of \$1,500 or more in any calendar quarter taxed 3.4 percent on taxable portion of wages up to \$4,200 for calendar year 1977 and to \$5,000 for 1978. This tax is reduced by credits for unemployment contributions paid to States up to 2.7 percent of FUTA tax.

20. Prior to January 1, 1977, estate tax rates were graduated from 3 percent on the first \$5,000 of net estate in excess of a \$50,000 exemption to 77 percent on portion over \$10,000,000; gift taxes were three-fourths of the estate tax schedule for corresponding brackets with a \$30,000 exemption subject to a \$3,000 annual exclusion for each donee. Beginning January 1, 1977, the separate rates for estates and gifts were replaced by unified rates of tax graduated from 18 percent to 70 percent. The separate exemption amounts were replaced by a unified credit of \$47,500 to be phased in over a 5 year period (\$30,000 credit for 1977 and \$4,000 for 1978).

21. Taxes on passenger automobiles and light trucks repealed December 11, 1971, by the Revenue Act of 1971.

22. Includes 50¢ and 2¢ per ton taxes on underground mined coal and 25¢ and 2¢ taxes on surface mined coal.

23. Includes delinquent taxes on items repealed by Public Laws 87-456, 88-36, and 89-44. Also includes sugar and interest equalization taxes which have expired.

24. Rate was reduced from 7 percent to 6 percent on January 1, 1976, 5 percent on January 1, 1977 and to 4 percent January 1, 1978 (Public Law 91-614).

25. Transfers of machine guns, short-barreled firearms, silencers, etc., \$200 each; certain guns with combination shotguns and rifle barrels, and other special types of firearms, \$5 each. Occupational taxes are levied on manufacturers, importers, or dealers in firearms and are included in the amounts shown.

Column Contents:

(2) Includes Forms 1040, 1040A, 1040NR, 1040SS-PR, 1040C, and 1042.

(3) Form 1040ES.

(4) Form 1041.

(5) Form 1065.

(6) Includes Forms 1120, 1120 Specials (Sched. PH, 1120L, 1120M), 1120S, 1120-DISC, 1120POL, 1120F, and 1120H.

(7) Includes Forms 705 and 706NA.

(8) Form 709.

(9) Includes Forms 940, 940PR, 941, 941PR & SS, 941E, 941M, 942, 942PR, 943, 943PR, CT-1, and CT-2.

(10) Includes Forms 990, 990PF, 990T, 990C, 9227, and 4720.

(11) Includes Forms 5501, 5502, 5503, 5504, 4848, 4849, and 990P.

(12) Includes Forms 7, 8, 11, 4705, 4706, 4707, 4708, Alcohol Excise Tax Returns, and Tobacco Excise Tax Returns.

(13) Includes Forms 720, 720M, 730, 2290, 118, 11C, and 4638.

(14) Includes Forms 1040X, 1120X, 2688, 4868, 7004, Tent. 1120L & M, 7005, 990AR, 4578, 5300 Series, 5329, 1041A, and 2438.

Table 9.—Number of returns filed, by Internal Revenue regions, districts, States, and other areas—Continued

¹ Includes Earned Income Credits claimed by taxpayer and also responses to notices sent to and returned by taxpayers whose tax returns showed the characteristics of but who did not claim Earned Income Credits on their tax returns. Data are for current tax years.

² Limited to taxpayers who filed a tax return solely to claim the Earned Income Credit.

³ The number of Earned Income Credit applications exceeds the total number of such credits in Column (1) because of dual application, i.e., partially refunded and partially applied to outstanding balance due. The amount of the Earned Income Credit applications equals the amount shown in Column (2). Note—amounts may not add due to rounding.

⁴ Earned Income Credits generated but applied to other than current tax year liabilities and those generated but temporarily unapplied pending resolution of taxpayer accounts.

⁵ The United States total for Column 9 includes 11,505 other Earned Income Credit applications which are not available by district and region.

Table 11.—Number of returns examined by class of tax and by internal revenue regions, districts, and other areas

*This figure represents actual IRS operating costs for FY 1975, 1976, exclusive of reimbursements received from other agencies for services performed. While the operating cost figures for fiscal year prior to 1975 may in some cases include reimbursements, those amounts are sufficiently small so as not to alter the cost figures in column 3.

Economic Stabilization Program average positions included in 1972, 1973, and 1974.

Federal Energy Program average positions included in 1974.

1972 adjusted by 3,959 average positions to reflect the AT&F transfer—July 1973. AT&F included in years 1948-71.

Eleven average positions transferred to office of the Secretary in 1965. Twenty average positions transferred to office of the Secretary in 1963.
